Li & Liao Optometry Acquires IPL: the Only FDA-Approved Device for Dry Eye

November 28, 2023

BAKERSFIELD, CA - November 28, 2023 -
Bakersfield, CA ? Li & Liao Optometry is proud to announce its recent acquisition of a state-of-the-art Intense Pulsed Light (IPL) device that?s designed to treat dry eye syndrome. This new technology marks a significant milestone in the practice's commitment to providing the most advanced and effective solutions for their patients' ocular health.

Unlike traditional treatments for dry eye, the Lumenis OptiLight device utilized by Li & Liao Optometry represents a groundbreaking approach. Developed by industry-leading experts and backed by clinical research, this cutting-edge device delivers targeted pulses of light to the meibomian glands in the eyelids, stimulating and rejuvenating their function. The result is a natural increase in the production of essential oils, promoting optimal lubrication and alleviating the discomfort associated with dry eye disease.

"We are thrilled to introduce this groundbreaking Lumenis OptiLight device at Li & Liao Optometry as it represents a significant advancement in our approach to treating our patients? dry eye syndrome,? said Dr. Yuh-Jen Liao, co-owner of Li & Liao Optometry. ?Addressing the root cause of dry eye is crucial for providing lasting relief, as this condition can stem from various factors. The most common cause, meibomian gland dysfunction (MGD), requires direct treatment for optimal results. With our newly acquired IPL device, we can precisely target and treat MGD, offering our patients a transformative solution that addresses the underlying cause and delivers long-term relief from dry eye discomfort."

What sets Li & Liao Optometry apart is their unwavering commitment to adopting and utilizing the best technologies in the industry, ensuring the highest standard of patient safety and treatment efficacy. The recently acquired Lumenis OptiLight device is the only FDA Approved dry eye treatment device currently available on the market, positioning Li & Liao Optometry as a force in the field of ocular health in their region.

"We are dedicated to staying at the forefront of advancements in eye care to better serve our patients,? said Dr. Dawson Li, co-owner of Li & Liao Optometry. ?IPL therapy allows us to offer a cutting-edge treatment for dry eye that provides long-lasting relief. Our focus has always been on improving the quality of life for our patients, and this device aligns perfectly with that mission."

The introduction of the Lumenis OptiLight device at Li & Liao Optometry reinforces the practice's dedication to offering comprehensive eye care services tailored to meet each patient?s unique needs. With a team of experienced and compassionate optometrists, state-of-the-art technology, and a patient-centered approach, Li & Liao Optometry continues to set the standard for outstanding eye care in the Brimhall and Wible Road areas.

"Dry eye syndrome is a prevalent condition that can significantly impact daily life,? Dr. Yuh-Jen Liao added. ?The addition of Lumenis OptiLight technology to our practice allows us to expand and enhance our dry eye treatment options and enables us to provide even more personalized care to our patients. We understand that every patient and their needs are different, so we take great pride in tailoring our treatments to each of their unique needs, especially since there are varying severities and underlying causes of dry eye. Our patients deserve the best, and we are thrilled to bring them the latest in ocular health technology."

The Li & Liao Optometry team, led by Dr. Yuh-Jen Liao and Dr. Dawson Li, is currently accepting appointments for new and existing patients who suffer from dry eyes. They offer a range of dry eye solutions, including IPL, at their Bakersfield locations.
