

Eyes on Fremont Officially Introduces Their Bellingham Location

December 04, 2023

December 04, 2023 - PRESSADVANTAGE -

Bellingham, Washington ? Eyes on Fremont has announced the latest chapter in their journey toward providing easier access to hand-picked and hand-crafted prescription glasses. Although not entirely new to the Eyes on Fremont practice, they're thrilled to formally introduce the availability of services at their new Bellingham location, further extending their commitment to providing exceptionally unique and stylish eyewear and improving vision and eye health to patients in the greater Washington area.

Eyes on Fremont has been a trusted name in optical retail since its inception on Halloween Day in 1996. Founded by Stan Jonasson and his wife, Linda Jangaard, the practice has gained a reputation for its personalized approach to hand-selecting eyewear from around the world and handcrafting Rx and frame combinations. They're known for producing the finest quality eyewear available in the area. With a longstanding presence in the heart of Seattle's vibrant Fremont neighborhood, Eyes on Fremont has become a beacon of excellence in eyewear and vision care.

The addition of the Bellingham location, which quietly opened its doors in 2022, represents an exciting expansion of their mission to provide personalized optical experiences by providing easier access to uniquely crafted glasses from small independent companies who are looking to get their name out.

"Our team is thrilled to officially introduce our Bellingham location to the community," Dr. Christina Fast, O.D., the lead optometrist at Eyes on Fremont, said. "While we've been serving Bellingham residents for over a year now, we wanted to take this opportunity to celebrate our presence and commitment to providing independent and quality eye care. A strong sense of community is also very close to our core values, so we're particularly proud to be a small business in such a vibrant and warm community."

Eyes on Fremont has always been focused on providing precise vision correction and offering unique, independent eyewear from small companies. They understand the important role that eye health plays in

ensuring patients look their best and see and feel their best. This is why their Bellingham office not only offers an extensive selection of eyewear frames and lenses but also a wide range of services ? including comprehensive eye exams and treatment for eye diseases ? through the independent optometrists of C Fast Optometry.

"Expanding to Bellingham was, and still is, a significant milestone for us," Mike Lebeiko, General Manager of C Fast Optometry, said. "It's not only a testament to the trust and support we've received from our patients and the community over the years but a reflection of our ongoing commitment to providing accessible, world-class eye care services to communities beyond Seattle. We look forward to continuing to serve our patients and communities in Bellingham and beyond."

Eyes on Fremont has always prided itself on its commitment to offering great frames and great service at great value. The Bellingham location is no exception, featuring a large selection of more than 4,000 hand-selected glasses from independent frame designers worldwide. This ensures that patients in Bellingham always have access to the latest eyewear designs, just like their Seattle counterparts.

With a retail optical in Seattle and now the Bellingham location, Eyes on Fremont is well-positioned to serve a broader spectrum of patients and communities. Dr. Christina Fast and the Eyes on Fremont team are accepting new and returning patients at both their Bellingham and Seattle locations.

About Eyes on Fremont

Eyes on Fremont is a retail optical in Seattle and Bellingham, Washington, devoted to bringing more independently owned and designed eyewear to the area. In their mission to "fight evil" by taking a stand against giant eyewear corporations, Eyes on Fremont hand-picks their frame selections from small independent companies worldwide and hand-crafts Rx and frame combinations to best meet style preferences and vision needs. Working hand in hand with the Eye of Fremont's opticians, patients can also see the independent optometrists of C Fast Optometry at all locations.
