

Gift Guide For Car Lovers Published By TAS Electronics

January 08, 2024

Holland, Ohio - January 08, 2024 -
TAS Electronics, a Holland, OH based supplier of car accessories and upgrades, recently published an extensive gift guide for car lovers and motor enthusiasts. With the holiday season in full swing, TAS Electronics is looking to help people pick out good gifts for their car-loving friends and family this Christmas.

The guide talks about all the different kinds of car-related gifts a car fan might enjoy, ranging from useful items that have the potential to greatly improve the recipient?s driving experience, to fun accessories that will show the giver?s appreciation for a significant aspect of their loved one?s life.

?The holidays are a magical time to gift the car enthusiast in your life,? says TAS Electronics. ?As Toledo?s premier car audio, accessories, and installation experts for more than 50 years, TAS Electronics has the ultimate gift guide for every type of auto aficionado. Whether you have a Ford or Chevy loyalist or Euro speed demon to shop for, we?ve got cool gadgets galore ? from custom comforts like heated seats to high-tech smartphone integration from Drone Mobile. For Motorcycle and Harley Davidson owners upgrade the sound on your ride with Rockford Fosgate or Kenwood sound systems. With decades of experience enhancing virtually every make and model, our experts can help select and professionally install the perfect present.

Your gift recipient will wake up Christmas morning to a Santa-approved, upgraded ride without popping a hood latch.?

The guide lists gifts for every budget, with the goal being to ensure that every motoring enthusiast receives a great gift this Christmas. First on the list is TAS?s heated car seats, which cost only $149 (including installation). The car seats come with a dedicated switch that allows the user to set them to high, low or off. Heated car seats are an excellent choice in general, and now especially, with temperatures being so low.

The second entry on the list is ?Toledo?s Best Remote Car Starters.? TAS Electronics has some of the best remote car starters on the market, and they have tried a vast number of items in this category. From 1500 feet to 3 miles, TAS Electronics? remote car starters come with a variety of different starting ranges. The company has sold thousands of car starters for almost every make and model on the market, and their technicians have the skills and tools to handle the installation of remote starters on every vehicle imaginable.

Similar to car starters, Drone Mobile for smartphones also makes an excellent gift for any car lover. Drone Mobile makes it possible to start a car from nearly anywhere. Those who already have a remote car starter from TAS are encouraged to enquire about getting Drone Mobile installed on their phones. The app allows for keyless entry, locking, and unlocking. It makes it possible to track the car and even sends alerts in the event the car is tampered with. The app does all this and more, making it an excellent gift for anyone.

The gift guide for car lovers goes on to talk about several other products that are available for purchase from TAS electronics this holiday season. The company has a wide selection of other products which have the potential to improve anyone?s driving experience in addition to being excellent gifts for people who love their cars.

Tas Electronics has been one of the top suppliers of quality accessories and other technology for cars, trucks, and more since they first opened their doors. Over the years, the company has built an excellent reputation among local motorists.

As one review of TAS Electronics says, ?Dave was very friendly and personable and helped me quickly and easily through the process of buying heated seats. Extremely happy with the friendly and quality service. Expect to be a returning customer!?
