

360Connect LLC Explains the Benefits and Usage of a Professional Business Phone System

December 13, 2023

AUSTIN, TX - December 13, 2023 - PRESSADVANTAGE -

Austin, Texas - 360Connect LLC, a company based in Austin, TX, wants to emphasize the benefits and usage of professional business phone systems, such as VoIP and digital phone systems. This typically means the use of digital versus analog phone systems. Voice over Internet Protocol (VoIP) allows voice calls through broadband Internet access instead of a regular analog phone line. Digital phone systems may retain the features of the conventional PBX system but instead of utilizing a central switchboard to route calls it employs a PBX system that exists in the Cloud. More about the benefits of digital phone systems over analog systems can be gleaned at <https://www.360connect.com/product-blog/digital-vs-analog-phone-service/>.

There are several kinds of businesses that can benefit from enterprise telephone systems. First of all, healthcare facilities can substantially benefit from implementing an enterprise telephone system by offering an integrated platform for managing inbound and outbound calls, call routing, voicemail, and text messaging, ensuring that messages are sent to the proper person, which contributes to enhanced patient care.

Government agencies can also benefit from enterprise phone systems as it can help reduce costs, enhance communication, and boost efficiency. It can help reduce the need to manage and maintain several locations,

while also ensuring consistent service for all locations. Large-scale businesses can also benefit from an enterprise phone system by offering a unified and secure communication system for customer and employees to streamline operations and boost efficiency. With an enterprise phone system, companies can be assured that their customers and employees are connected to ensure their operations will be running smoothly.

There are a number of features offered by enterprise phone systems. These include the: auto attendant, call routing, call forwarding, conference calling, call queuing, voicemail, mobile app integration, third-party integrations, interactive voice response, call reporting and analytics, call recording, virtual meetings, call block, and custom greetings.

To help businesses find the best enterprise phone plans for their unique purpose, 360Connect has also published a blog post that can be accessed at <https://www.360connect.com/product-blog/5-best-phone-plans-for-businesses/>. They have identified what they consider to be the best providers as: Verizon, AT&T, Zoom, RingCentral, and Nextiva. They advise businesses to check on a number of features when choosing the best plan for their business. These include scalability and flexibility, features and functionality, cost and budget, network coverage and reliability and integration and compatibility.

With regards to pricing, it may be dependent on the Internet speed chosen. For instance, with Verizon, the 100 Mbps speed is priced at \$69 per month, 200 Mbps is priced at \$99, while the 400 Mbps speed is priced at \$199. Verizon is one of the leading providers of phone services. They offer one of the most reliable networks and they are multi-national company, which means they span various parts of the globe. Meanwhile, AT&T provides a wide range of services and is one of the most equipped to handle the needs of big businesses, much like Verizon.

Meanwhile, Zoom has become very popular during the pandemic as a video meeting platform. However, they have now grown into a provider of all-inclusive suite of products and services. Businesses that have made investments in the Zoom platform may find that their VoIP system is perfect for them. RingCentral is top provider of digital phone system solutions that eliminates the need for on-premises PBX hardware. It offers video conferencing, CRM integration, a mobile app, and voicemail-to-text transcription. Nextiva is another relatively young company that offers a cloud-based VoIP phone service for modern work environments.

Established in 2006, 360Connect LLC is an online service offering the benefit of the simplification of the business-to-business (B2B) purchasing process, allowing buyers to save time and money by getting free and no-obligation quotes and purchasing advice from qualified suppliers. For suppliers, they provide warm leads through their verification and filtering procedure, which is provided within five minutes of lead notification. They can assure suppliers that the leads they produce and give to each client are high quality and suitable for

their unique needs.
