Chicago Website Design SEO Company Publishes Review For WPX Hosting

December 18, 2023

Chicago, Illinois - December 18, 2023 -
Chicago, Illinois based Chicago Website Design SEO Company (CWDSC) has published a review for WPX hosting. The company has established itself as a reliable provider of high quality website design, SEO optimization, pay-per-click advertisements, reputation management, and competition report services across the United States.

WPX Hosting is one of the options available for people who are searching for a convenient way to host their WordPress websites. As a company that has been well-established and in operation for some time, WPX Hosting has earned a reputation as a reliable, high performance option for WordPress websites. In his review, CWDSC CEO Jack Lombardi explores the intricacies of using WPX Hosting today.

According to the review, WPX Hosting offers all of the usual features anyone would expect from a WordPress website host. However, there are additional features offered by WPX Hosting, on top of the standard suite of features, that need to be taken into account.

One such feature is daily website backups. WPX Hosting backs up websites on a separate server to reduce the likelihood of a single event wiping multiple backups, and all backed up data is preserved for 14 days. In the event of data loss at the primary site (which should be considered an eventuality), the retrieval of backed up files is free.

The review also details that WPX Hosting offers a website migration service at no added charge. Usually, the migration process can be complex and costly. This is not a concern with WPX Hosting, as a team will work with website owners to easily move an existing WordPress website to WPX?s servers. Also included in this service is the transfer of all emails associated with the site. The review also notes that all plans offered by WPX Hosting come with an email service that allows website owners to send and receive emails through the email address associated with the website domain name.

Lombardi highlights WPX Hostings dashboard as one of the best features offered by the company. Whereas most other hosting companies have complex and complicated dashboard, WPX Hosting has a refreshingly straightforward dashboard, which the review mentions made every function easy to find and easy to use.

The review also praises the company?s support team, detailing his speedy experience with them. It says, ?Here is my experience with WPX Hosting. I notice I have a problem on my site and immediately send a support ticket. In a short 10 to 15 minutes, I get a response. They let me know they are working on the problem. 15 to 30 minutes later, the issue is solved, and they send me a notification to tell me all is well. Seems crazy but it?s true. There have been responses that were as fast as 2 to 5. The slowest I have experienced was 30 minutes.?

The review also notes that WPX Hosting has recently started offering SSL certificates for free through Google sponsorship. SSL activation is incredibly fast, requiring just a few clicks on the management dashboard. In addition to SSL, websites will also be protected using enterprise-level DDoS protection by Incapsula. Malware scans are done on a daily basis.

In his verdict, Lombardi recommends WPX hosting. He says, ?You will probably not deal with any major problems, and in case there is one, you can rest assured that WPX Hosting will handle it with precision. Migration is fast and transparent with the team updating you on everything they are doing. WPX Hosting has dedicated their time and resources to taking care of their customers through high quality web hosting services and an impressive customer support team that responds fast and handles any problems that you might be dealing with. For these and many other reasons, I highly recommend WPX Hosting.?

Those who wish to learn about WPX hosting or the many services provided by Chicago Website Design SEO Company are welcome to start with the company's website. They also encourage interested parties to get in touch with Jack Lombardi directly via email or phone. Alternatively, CWDSC can be found on Facebook.
