

## **Truck Mud Flaps Available at Go Industries Inc**

*December 29, 2023*

Richardson, TX - December 29, 2023 - PRESSADVANTAGE -

Go Industries Inc, a supplier of high quality truck accessories and parts based in Richardson, TX, is working with local truck owners who need quality truck mud flaps. The company has a wide range of mud flaps for all types of trucks and all budgets.

Mud flaps are an absolute necessity, as many truck owners will attest, as they protect both the truck and nearby vehicles from all kinds of damage. In most states across the country, it is mandatory to have truck flaps on any truck. The high quality truck mud flaps that are available at Go Industries are a low cost, long term solution that Texas truck drivers would do well to take advantage of.

All kinds of trucks, including work trucks, city trucks and off roaders, require a bit of extra protection from road debris. Small stones and other bits of debris that might be found on the road can do serious damage to a truck and have been known to damage other nearby vehicles on the road when propelled by moving tires.

There is also the problem of dirt, which as the name ?mud flaps? implies, is a major concern of truck drivers everywhere. The fender walls of a truck alone do not reach down to the tires, leaving a significant area

exposed. This allows the tires to flip all manner of debris out violently in all directions, causing damage to vehicles and potentially even pedestrians.

Go Industries mainly supplies mud flaps for duallys. The company states, "A 'dually' or dual rear-wheel truck (DRW) is a heavy-duty pickup truck that has dual, or two rear wheels on each side. This allows for greater contact with the road resulting in better traction, stability and balance. Dually wide body trucks have large brawny rear fenders to house the dual rear wheels. These tough trucks can haul heavy loads and tow boats, trailers and campers. With these large dual wheels in the rear comes the need for mud flaps, but not just any mud flaps. A dually needs larger mud flaps that are tough, durable and worthy!"

They continue, "That's where Go Industries comes in. Since 1978, Go Industries has been on the pulse of the truck accessories market, providing long-lasting, durable and handsome add-ons for truck owners. Our mud flaps are no exception. With quality second to none, the Go Industries Truck Mud Flaps are built tough and built to last."

With an extensive list of products from the top American suppliers of truck mud flaps, Go Industries preferred by many (both within and outside the state) for all their truck accessories. The company makes it a point to stock only the best products from the best suppliers and to only sell American-made truck flaps and other accessories.

By exclusively selling local products, the company can guarantee quality, low prices and availability. Much of Go Industries' stock is manufactured not only within the country but in Texas specifically, meaning truckers can always be sure they are getting the best of the state's output.

The company's wide selection of products is also easy to browse, thanks to their online shopping system. Customers can input the exact make, model and year of their truck, combine it with the type of accessory they are looking for, and the system will lead them right to it.

Go Industries manufactures several products of their own as well. From design and assembly to packaging and beyond, the company can help Texas truckers get exactly what they need at very low prices.

"Ordered a headache rack for a work truck on 8.25," says a review from a customer who used Go Industries' online shopping system. "Received tracking the same day, and it was delivered the following Thursday. Finally installed it last weekend, and it looks great. Looking into putting a rancher on my truck as well."

Customers may get in touch with Go Industries to learn more about all the products available on their website

and at their Richardson, Texas offices. They are always more than happy to help Texas truckers find the right accessories for their truck no matter what the make, model, needs or budget of the customer may be.
