Mount Pleasant, Western Australia based SmallBiz SEO Perth has announced new services that assist with the search engine optimization requirements of businesses and individuals. The company specializes in SEO and AdWords pay per click marketing. Julie Liew, spokesperson for the company, says, "We will be providing Perth based businesses with SEO services that are designed to get their websites noticed, and get them more traffic which ultimately means more revenue."

SmallBiz SEO Perth is an online marketing company that provides services to entrepreneurs, small businesses, and corporations. Their new suite of SEO services is specifically designed to help businesses reach their targeted audiences, and they use a number of strategies and techniques, all of which are industry proven to work. The company states that they can assist any small to medium sized business in Perth to gain traffic and have a more successful website.

"We listen to our clients," states Julie Liew. "We understand that not every business is alike and this means

that your needs will also be different. We will speak with you about what you want to accomplish, and lay out a plan that will help you to reach your unique goals."

Julie Liew explains that SEO is vital for any website in order to be successful. For companies to get visitors, which directly translates into purchasers for more online businesses, they need traffic. It is these proven SEO tactics that offer the best way to receive quality traffic. She says that optimizing webpages is essential, and the company offers experience and knowledge of how to effectively optimize every site. An explanation of the services can be seen at <https://www.youtube.com/watch?v=6C7bVEd-VFk>.

The company employs a number of methods including content publishing and various white hat strategies that are legitimate and effective in driving quality traffic to websites. Julie Liew states that the company has never and will never use black hat techniques, which could cause websites to be penalized by Google and other major search engines.
