

Koniver Aesthetics Introduces Medical Weight Loss Programs Featuring New Drugs

December 19, 2023

December 19, 2023 - PRESSADVANTAGE -

West Ashley, SC ? Koniver Aesthetics has announced the roll out of their new medical weight loss programs, which feature innovative new weight loss drugs to assist patients in meeting their goals: semaglutide and tirzepatide. With the introduction of these new programs, Koniver Aesthetics aims to make it easier for patients to manage their weight in a safe, clinical setting with the help of a highly educated team.

Semaglutide and tirzepatide are among the most requested and researched drugs that are used for medical weight loss, with long-term medical evidence supporting their ability to help patients lose weight. Koniver Aesthetics continues to pave the way for medical spas at the intersection of wellness and aesthetic medicine, as they continue to expand their offerings aimed at the body.

?Everyone knows that semaglutide works,? said Keli Koniver, founder of Koniver Aesthetics. ?But few are aware of how incredible the results can be when combined with our TruSculpt® body contouring device.?

Semaglutide and tirzepatide are both weekly injectable drugs that were originally created to help diabetic patients manage their condition. They act upon hormone receptors in the brain, tirzepatide upon two and semaglutide upon one, that control feelings of fullness while lowering blood sugar. Both alter digestion and feelings of satiety to allow for sustainable weight loss, without the appetite suppressant effects of older weight loss medications.

Tirzepatide and semaglutide can enable patients to lose up to 15-20% of their body weight. With the increasing interest in semaglutide and tirzepatide, medical weight loss has become a popular service at certified medical spas that are equipped to test and treat patients, like Koniver Aesthetics. Consultations and regular check-ins enable patients to safely manage their weight while on their medication. Once the patient has reached their target weight, the med spa?s staff will help them ween off of the medication and create a plan to help them maintain their results.

"We are excited to incorporate these popular weight loss options with our body contouring treatment modalities for turbo charged individualized results," added Koniver.

TruSculpt® body contouring treatments are also a large part of the "full luxury experience" at Koniver Aesthetics. The practice focuses on providing patients with services that help reduce fat while building muscle, for a desirable taut, toned physique. Thanks to their popularity, the practice has added their body contouring services to their "Platinum" membership program as a way to help medical weight loss patients refine their results once they are closer to their goal weight as part of a well-rounded weight loss management plan. TruSculpt® body contouring treatments are typically best recommended for patients who are within 10-15 pounds of their ideal weight, making the combination a natural complement.

Koniver Aesthetics is open and taking appointments for new and current patients.

About Koniver Aesthetics

Koniver Aesthetics is a boutique medical spa noted for catering to high-end clientele as well as those keen on investing in their beauty. Industry-leading aestheticians and doctors provide elevated services in a luxurious space, as the practice also maintains a satellite location in The Jasper. Treatments at Koniver Aesthetics encompass non-surgical services, targeted topical skincare, injectables, and all-encompassing health services like medical weight loss. Emphasis is laid on great skin and good health: the practice philosophy centers around looking and feeling well inside and out. Tailored care has helped Koniver Aesthetics establish themselves as a premier destination for discerning patients in South Carolina, with patient education remaining a priority for jet set patients.
