

My Beauty Blade Resumes Orders In Australia & Beyond

January 04, 2024

January 04, 2024 - PRESSADVANTAGE -

My Beauty Blade, based in The Ponds, NSW, is pleased to announce the relaunch of their website and business. Having temporarily ceased services to ensure the team's safety during the pandemic, the team is excited to return to work and help everyone in the community pursue their best selves once more.

"Our customers have been clamoring for ages for our return," notes a representative from the beauty clinic, "We are delighted to confirm that we are back and ready to work with our beloved community again. Production of our Beauty Blades is underway once more, and orders can be placed conveniently through the relaunched website. Demand is expected to be high during this period, so please get your order in today to ensure it arrives on time."

Dermaplaning is a cosmetic procedure that involves gently scraping the surface of the skin with a surgical scalpel to remove dead skin cells and fine vellus hair (peach fuzz). This procedure is performed by a licensed skincare professional or dermatologist and is commonly used to improve the overall texture and appearance of the skin, as well as to enhance the effectiveness of skincare products. Dermaplaning can be used to reduce the appearance of fine lines, increase product absorption and provide a smoother canvas for makeup application.

New users should note that dermaplaning has no effect on hair growth rate and texture, so they need not worry about this procedure resulting in thicker or longer hairs. This is a myth, and customers who try the company's Beauty Blades universally have positive experiences to share. This is one reason the company enjoys an excellent reputation in the community.

The company is pleased to add that there is a special package available for customers who are trying out the Beauty Blade for the first time. Many find the brand following a referral from friends or family, and this presents a perfect opportunity for them to try out the First Timer Essentials Bundle from My Beauty Blade.

In addition to 4 Beauty Blades, this product ships with a microfiber headband, makeup remover pro duo and a waterproof mesh cosmetic bag. Further, customers may be pleased to discover that the makeup remover pro duo includes an ultra soft cushion and ultra soft mitt. Both are designed for comfort and ease of use when dermaplaning. This serves as an excellent introduction to the brand and its products, especially since these items can be used just as easily with future orders.

Typically, however, a customer's order will consist of a standalone pack of personal Beauty Blades. The company has three options on offer, giving customers a choice between a pack of 4, 8 and 12 Beauty Blades. Customers who opt to try dermaplaning for the first time with the introductory bundle should use this opportunity to figure out how often they will use their blades. This will help them decide what the right number of Beauty Blades should be for their regular orders.

My Beauty Blade explains that customers will be able to get between 8-10 uses of each blade if they take care of it correctly, so this should be more than enough time to determine how often they want to dermaplane themselves. Each individual will have a unique dermaplaning preference, based on the thickness of their hair, skin texture and other factors, and the only way to develop a working schedule is to try it out.

The company explains that some may prefer to dermaplane on a weekly basis while others may wait at least a month or more between sessions. If they dermaplane more often, the larger pack of Beauty Blades would be better suited for their uses, and vice versa.

Dermaplaning is an easy, non-invasive procedure that anyone can do at home to improve their skin, and they can now rely on My Beauty Blade to supply them with high-quality blades to do so. My Beauty Blade ships throughout Australia and internationally, and orders can now be placed via the company's official website.

Further questions may be directed to the team via the website's contact portal. The company can also be found on Instagram and other social media platforms.
