Alpha Therapeutics Offers Lab Tested Extra Strength CBG Products For Chronic Pain And Anxiety

January 08, 2024

January 08, 2024 -
Alpha Therapeutics, a pharmaceutical cannabidiol (CBD) manufacturer and distributor based in Scottsdale, AZ, is offering Extra Strength CBG products to help customers reduce chronic pain and anxiety.

Alpha Therapeutics offers a range of CBD, CBG, and CBN products formulated by doctors. Completely free of THC, the psychoactive component of the cannabis plant, the products are safe to use, and customers don?t need a prescription to purchase them. Moreover, in a bid to maintain a high-quality output, the company manufactures its products from organically farmed hemp and subjects them to independent lab testing for purity.

The company?s founder, Geoffrey Dada, explains the care and precision that goes into creating its products by saying, ?Alpha Therapeutics harvests plants that have high amounts CBD to bring you natural, raw, healthy benefits for optimum relief from chronic pain. We also use a CO2 method to process the plant to ensure that the product is not filtered or heated in a way that could damage the plant. This ensures the highest quality ingredients in every Alpha product to preserve the ?entourage effect.??

The company?s Extra Strength CBD oil, which retails for $125 per bottle, contains 20 servings each with one serving equal to one full dropper. Each serving contains 100mg of CBD and 50mg of CBG equating to 3000mg CBD and 1500mg CBG for the whole bottle. The plant-based anti-inflammatory calms pain and nerve receptors throughout the body giving customers relief from chronic pain and reducing their anxiety.

Buyers can verify the purity of the product by visiting the website and viewing its Certificate of Analysis that backs up Alpha Therapeutics? claims of its potency. The product also contains terpenes, the building blocks of essential oils, that demonstrate analgesic properties in clinical studies, as well as cannabis flavonoids that have been shown in research to contain powerful antioxidants and anti-inflammatory properties.

The story behind the founding of Alpha Therapeutics gives customers a clear glimpse into its vision. Geoffrey began his journey with CBD after he realized he needed a natural way to help repair his body and ease the pain of training for marathons. Soon, he went down the rabbit hole of CBD products on the market and found them extremely underwhelming. Upon further research, he found that the products only had a fraction of the CBD stated on the label.

?As an ultrarunner,? says Geoffrey Dada, ?I need to make the most of the time I have to rest as that is when the body heals from the trials and tribulations of the outdoors. I turned to CBD products as I expected them to help me recover faster while improving my sleep. However, the products available for sale were misleading customers by exaggerating the amount of CBD in them leading to frustrating results. That is when I began manufacturing my own CBD products. Then, I partnered with my friend Tyler Southwell, MD, to tap into his expertise and make the products even more potent and effective.?

Several patients have thanked the company for its products and the change they experienced in their lives. One customer writes, ?Over the years, since 99, I've had approximately 20 procedures for four cervical fusions in my neck. I was on pain medication encompassing opioids and methadone. They never really worked all that well. It makes you kind of dull and miserable. I gave all that up and I finally found this product that does help. It starts in about 20 minutes and lasts for a couple of hours for me. I use it on my neck and the back for muscle spasms. I also have nerve pain that comes down to my arms from my last surgery on both sides. It's really nice not to be in pain since I haven't been like that since 88. So, it's a wonderful product. I highly recommend it.?
