

# Pentastar Aviation Selects Vision Aircraft Records as Official Aircraft Logbook Software Provider

*December 29, 2023*

December 29, 2023 - PRESSADVANTAGE -

Waterford Township, MI: In a significant stride toward modernization and enhanced efficiency, Pentastar Aviation is thrilled to announce its collaboration with Vision Aircraft Records as the official provider for aircraft logbook software solutions. This partnership establishes Pentastar as one of the pioneers in truly paperless aviation and underscores a mutual commitment to advancing technology in aviation operations and maintaining meticulous, secure records in the fast-evolving aviation sector.

Vision Aircraft Records' revolutionary Secured Managed Aircraft Records Technology (S.M.A.R.T) is the only FAA accepted electronic record keeping system in business aviation. S.M.A.R.T centralizes and digitizes all aspects of recordkeeping, including maintenance entries, inspections, and airworthiness data. The system allows users to search, share, and manage all their aircraft records on a cloud platform.

Benefits of using this digital solution include eliminating the risk of losing critical documents, supports liquidity of the aircraft, and provides a huge reduction in maintenance costs due to the time spent researching and managing records.

This strategic partnership will integrate Vision Aircraft Records' cutting-edge digital logbook software into Pentastar's suite of services, further solidifying their commitment to innovation and service excellence.

"Working with Vision has been great. We had an aircraft in pre-buy, and they traveled on site to onboard the aircraft during the pre-purchase inspection. This allowed us to start the conformity process before the aircraft arrived on site and have it 95% complete when it did arrive," said Josh Rowe, Managed Fleet Director of Maintenance.

"We are honored to work with Pentastar Aviation, an esteemed name in business aviation. This collaboration is a testament to our mutual goal of advancing the aviation industry through technological innovation. We are excited to contribute to Pentastar's ongoing success and excellence," stated Mark Leeper, CEO of Vision Aircraft Records.

## About Pentastar Aviation

For nearly 60 years, Pentastar has carved out a reputation as the premier private aviation services provider in the United States. Headquartered at Oakland County International Airport (PTK), Pentastar combines high-level aircraft maintenance and management with award winning complementary and support services, including: private jet charters, comprehensive aircraft management services, award-winning FBO services, full MRO services, high-end inhouse catering with Fivestar Gourmet and advisory services.

Pentastar Aviation has been crowned the #1 FBO in the Americas for three consecutive years, from 2021 to 2023, a feat unprecedented in the industry. The revered AIN FBO survey, which evaluates FBOs across line service, passenger amenities, pilot amenities, facilities, and customer service representatives, distinguished Pentastar as the sole FBO to rank in the top 10 across all categories in 2023.

## About Vision Aircraft Records

Since 2016, the Vision Company's Secured Managed Aircraft Records Technology (S.M.A.R.T) has been the Aviation Industry's most trusted Aircraft Digital Logbook platform. Securing and managing close to \$2 Billion in aircraft logbook value, Vision is meeting one of the greatest challenges in the aviation industry today . . . The conversion of over 100 years of "paper based" aircraft maintenance records into aircraft digital logbooks (ADLs).

Focused on user-centric design and robust security, Vision Aircraft Records enables aviation companies to manage their maintenance records efficiently and effectively.
