

Go Industries Inc Is Offering Dually Truck Mud Flaps and More

January 02, 2024

Richardson, TX - January 02, 2024 -
Go Industries Inc, a company based in Richardson, TX, that manufactures truck accessories, is pleased to announce they are offering mud flaps for trucks, including for dually trucks. The purpose of these mud flaps is to protect the truck?s paint and also other drivers from spraying mud, debris, salt, sand, rocks, and more. At best, the mud, rocks, and other debris will cause the truck to become a dirty mess that needs to washed. At worst, the mud, rocks, and debris will damage the truck?s paint. Such mud flaps are also available for dually trucks, such as Ford, Chevrolet, Dodge, and CMC from Go Industries. Their new dually mud flap options include diamond treads, mounting brackets, stainless steel accents, and anti-sail brackets.

Meanwhile, a dually or a dual rear-wheel truck (DRW) is a heavy duty pickup truck that has two rear wheels on each side. Such a truck provides the advantage of having a larger contact with the road to ensure better traction, stability, and balance. Dually wide body trucks have large rear fenders for housing the dual rear wheels. These big dual wheels need to have mud flaps that are tough durable, and capable of withstanding the impact of mud, debris, stones, and more.

A spokesperson for Go Industries says, ?Whether you have a work truck, a city truck or an off-roader, mud flaps can protect your truck by deflecting debris away from the fender wells. Your tires are constantly contacting all kinds of potentially paint-damaging things like mud, tar and small rocks. While your truck?s fender wells are designed to contain stuff like this, they can?t do it all and that is where mud flaps come in. Fender walls do not reach down to the tires and leave a substantial area unprotected allowing your tires free to flip mud, rocks, salt and more out violently toward your paint as well as other drivers behind you.?

The spokesperson adds, ?A work truck entering the road from a construction site can easily pick up small rocks in the tire treads and then flip them out at highway speed resulting in dings and dents to your truck or other vehicles. Installing the right mud flaps can save you money and time by keeping your truck cleaner and better protected from rocks, tar, salt, mud and anything else that can get swept up in your tire treads and thrown out toward an unsuspecting paint job.?

The mud flaps are essential for any kind of truck while on the road. Mud flaps are mandated by most states and the company?s mud flaps can deflect mud, stones, and debris from the rear tires to protect the truck, including any motor vehicles that are behind the truck. These mud flaps have been manufactured using non-recycled rubber. Their dimensions are 19 inches by 24 inches for all dual wheel trucks and 12 inches by 24 inches for single wheel truck. Go Industries also offers stainless and diamond tread accessories for all mud flaps.

Established in 1978 by Mr. R.J. Orth, Go Industries Inc is a company based in Richardson, TX, that provides accessories for trucks in the United States that are made using state of the art facilities that used computer controlled manufacturing equipment and robotic welding machines. Some of the accessories they can provide are: Rancher Grille Guard, Pro Series - Winch Bumper Replacement, Big Tex Grille Guards, Winch System Grille Guards, law enforcement vehicle accessories, mud flaps, steps, racks, and custom manufacturing products. Go Industries also provides different types of custom manufacturing services for making vehicle accessories. They offer sheet metal services, tube services, and other services. With more than 40 years of manufacturing experience, Go Industries is capable of manufacturing high quality custom products. All of the manufacturing work they do are done locally, and all of their pricing is meant to be as competitive as possible.
