Medical Clinic in Miami Lakes that Offers Primary Care Physician Services and More Launches New Website

January 09, 2024

January 09, 2024 -

All-Inclusive Preventive Care LLC, a medical clinic in Miami Lakes, FL, with the mission of providing cost-effective, accessible, and high-quality health care to everyone in their area, has recently launched their new website. With this new website they expect site visitors to easily understand what they have to offer, such as: primary care, gynecology, well woman annual exam, women's health, annual physical exams, hormone replacement therapy, medical weight loss, preventative care, and more. Their goal is to become the preferred health care provider in Miami that provides comprehensive, cost-effective, and quality health care with their team of professionals and modern equipment.

"We believe everyone deserves access to quality, affordable healthcare, regardless of language or financial constraints," says Evelyn Rodriguez, Chief Surgeon at the medical clinic. "Our new website reflects our commitment to transparency and patient empowerment. It provides clear information about our services, pricing, and prepay options, making it easier than ever for individuals to take charge of their health."

The quality of their services is attested to by the five-star reviews they have been receiving. They have an overall rating of 4.9 out of 5 stars on Google after receiving more than 200 reviews. In a recent review,

Beatriz T. gave them five stars and said, ?I went to All Inclusive for a weight loss program and I felt very welcoming by their staff. They are very friendly and professional and explained every step of my treatment, very clear and understandable. The clinic is very warming and clean, I will definitely keep going back for my weight loss. Highly recommended.? In another recent review, Anthony C. also gave them five stars and said, ?Great experience, super friendly staff, would recommend.?

They offer gynecological consultation and annual gynecological exams. They want to emphasize that they prioritize women?s health with their top-tier gynecological services. The clinic ensures that every woman can openly discuss her health problems with her doctors. She feels assured that she?ll be getting accurate results, excellent care, and the understanding that she needs.

They also offer well-woman annual physical exams, which are an essential part of taking care of their reproductive health and their general well-being. This physical exam is the best way to detect the early stages of cervical cancer and it also serves as the first line of defense against diseases affecting the female reproductive system. The annual physical exam for women will include the: physical exam, breast exam, pelvic exam, and pap smear.

They also provide bioidentical hormone replacement therapy with pellets. These pellets are tiny, custom-compounded therapies for symptoms arising from hormonal imbalances. This therapy may help to maintain consistent hormone levels in the patient throughout the day. The hormones contained in the pellets are bioidentical to those that are naturally found in the body.

They also provide medical weight loss services, which allow the patient to lose weight without undergoing surgery. The strategy is to modify the patient?s relationship with food to get rid of harmful eating habits and achieve a healthier lifestyle.

Founded in 2020, All-Inclusive Preventive Care LLC aims to offer cost-effective, high-quality, and accessible health care services, including primary care, well-woman annual exam, women's health, gynecology, hormone replacement therapy, medical weight loss, annual physical exams, preventative care, and more. Evelyn Rodriguez is the Chief Surgeon and Master in Sexology, Ultrasound, Genetics and Perinatology. She earned her Doctor of Medicine with a specialty in obstetrics and gynecology from the Higher Institute of Sciences of Havana in 1992. She has an Advanced Practice Nursing License and a Registered Nurse license. She is a certified Surgical Assistant and has certification in BLS/ACLS, NRP and advanced fetal monitoring.
