

Go Industries Inc. Shares The Importance Of Dually Truck Mud Flaps For Protecting Dual Rear Wheel Trucks From Damage

January 09, 2024

Richardson, TX - January 09, 2024 -
Richardson, TX-based automotive accessory manufacturer, Go Industries Inc., is manufacturing high-quality mud flap kits designed to protect trucks as well as the vehicles behind them.

Mandated by most states, mud flaps for trucks deflect debris from the rear tires to protect the vehicle they are installed in along with everyone else on the road. Regardless of whether one is driving a work truck, city truck, or off-roader, mud flaps play a crucial role in protecting the truck by deflecting debris away from the fender wells. While a truck?s fender wells are resilient to some degree of debris and damage, it is recommended, and in some cases legally required, to not leave them unprotected without mud flaps.

The spokesperson for Go Industries Inc. says, ?Your tires are constantly contacting all kinds of potentially paint-damaging things like mud, tar, and small rocks. Fender wells do not reach down to the tires and leave a substantial area unprotected allowing your tires to flip mud, rocks, salt, and more out violently toward your

paint as well as other drivers behind you. Mud flaps solve this issue and keep your truck cleaner and better protected.?

Duallys or dual-rear-wheel trucks (DRW) are especially prone to damage from rocks, tar, salt, mud, and anything else that can get swept up in the tire treads and thrown out toward an unsuspecting paint job. The wider area of contact for heavy-duty pickup trucks, which improves traction, stability, and balance, means that duallys have a greater risk of being damaged by debris on the roads or off-road areas.

The spokesperson says, ?Dually wide-body trucks have large brawny rear fenders to house the dual rear wheels on each side. While these tough trucks can haul heavy loads and tow boats, trailers, and campers, they are susceptible to mud, small rocks, and tar lodging in the fender wells. So, duallys need larger mud flaps that are tough, durable, and worthy. At Go Industries Inc., we are focused on offering the truck accessories market long-term and durable add-ons that are not only functional but also aesthetically pleasing. Check out our website to browse through our dually truck mud flaps and equip your truck with the protection it needs.?

The company?s dually mud flaps retail in a range from $37.41 to $209. Available for most popular trucks, Go Industries Inc. provides mud flap kits for makes such as Chevrolet, Dodge, Ford, and GMC starting from 1973 and models such as 2500/3500, 2500HD/3500, Ram, and Superduty. The mud flaps are also available in various options including the Classic Dually Set, the Stainless Steel Dually Set, and the Diamond Tread Dually Set. Customers can also purchase just the Dually Flaps & Brackets Only or Dually Mounting Brackets Only.

?Many of our customers drive work trucks that are often on-site where there is a lot of construction activity,? says the spokesperson for Go Industries Inc. ?When they drive onto the road, they can easily pick up small rocks in the tire treads and then flip them out at highway speed resulting in dings and dents to their trucks or the other vehicles on the road. Installing the right mud flaps, then, not only saves you money by protecting your own vehicle but also protects everyone else who is on their daily commute.?

Go Industries Inc. has been manufacturing high-quality parts for all kinds of vehicles for over 45 years now. All its products are made wholly in the USA and are backed by the Go Industries warranty. The company boasts state-of-the-art facilities that utilize computer-controlled manufacturing equipment and robotic welding machines to create truck accessories for civilian as well as law enforcement vehicles. Its truck accessories include front-end items such as grille guards, winch application systems, and bumper replacements, back-end items such as airflow tailgates, and headache racks, as well as mud flaps and steps.
