Lake Worth Beach, Florida - January 11, 2024 -
A & J Insurance Services is helping Florida vehicle owners understand why they need auto insurance and what are the best ways to save money while doing so.

Florida is a no-fault state when it comes to auto insurance. This means that regardless of who is to blame for the accident, drivers should be insured to cover their own medical expenses as well as the property damage they cause to the other party or parties. There are two types of insurance that Florida drivers are required to have ? Personal Injury Protection (PIP) and Property Damage (PD) ? with a $10,000 minimum coverage. Without being insured for this requisite amount, drivers in Florida cannot register, tag, or drive their cars on the state?s roads.

Moreover, there are also additional car insurance coverages that drivers should consider getting. For example, vehicle owners in high-net-worth parts of the state where they share the road with expensive and luxury vehicles, are recommended to increase their PD coverage in case they were to collide with the high-end vehicles. Other coverage options include comprehensive and collision, bodily injury, uninsured motorist, medical payments, towing, rental, roadside, and many more.

A recent review says, ?By far the best place to get insurance. Got insurance from them three times and always had the lowest rate of all the quotes I received. If you tell them what you need without trying to BS, then they will try their best to help you. Saved me about $100.00 a month.?

Another customer writes, ?The 2 gentlemen that run this insurance haven are so welcoming and helpful. They got me the best insurance at the lowest price the first time around. I haven't and will never leave. Geico The General and Progressive quoted me double the price that A & J quoted me. And they work with you no matter what the circumstances. I love this place! Go here before you go anywhere else. It will save you time, phone calls, and stress.?
