

## GrinderCrusherScreen: A Trusted Partner in New and Used Recycling Equipment

*January 11, 2024*

January 11, 2024 - PRESSADVANTAGE -

Smyrna, GA ? GrinderCrusherScreen? emerged to fill a significant niche in the used recycling equipment industry, driven by a commitment to honesty and a consultative sales approach. The company?s inception is rooted in addressing the need for an experienced and reliable provider of recycling equipment, ranging from wood grinders and crushers to screening plants, shredders, compost turners, and more.

Founded by the seasoned professionals of Screen USA Inc., a manufacturer of American-made portable screening plants and wood grinders, GrinderCrusherScreen? inherits over four decades of industry know-how from its parent company, established in 1973. Headquartered in Smyrna, GA, with an additional location in Salem, OR, the company?s reach stretches across the U.S., Canada, South America, and globally, backed by knowledgeable sales representatives in various territories.

GrinderCrusherScreen? offers an impressive range of inventory featuring a comprehensive selection of used equipment from leading brands like Morbark, Peterson Pacific, McCloskey, Diamond Z, Vermeer, Nordberg,

Metso, Powerscreen, Extec, and Sandvik, alongside new machinery from Screen USA, CAMS, CZ Screens, GCS Conveyors, and Evortle. In addition, the company offers a free listing service for those looking to sell their recycling equipment, ensuring a seamless and effective sales process.

In addition to being an industry leader in equipment sales, GrinderCrusherScreen? provides customers with a full line of top-quality wood grinder wear parts, including tips, hammers, screens, and hardware from major manufacturers. The company?s commitment to quality is unrivaled, which is no better demonstrated than by its competitive pricing and unmatched customer service.

Understanding the industry's focus on cost-effectiveness, GrinderCrusherScreen? encourages customers to delve deeper into what makes each machine unique. GrinderCrusherScreen? emphasizes value over mere pricing, educating customers on critical aspects like grinder screens' composition or carbide coverage on tips. The company believes that an informed customer is its best asset, as customers quickly recognize that not all equipment suppliers stand on equal footing regarding quality and reliability.

When asked what separates GrinderCrusherScreen? from the competition, a company spokesperson had this to say: ?As a company deeply rooted in the recycling equipment industry since 1973, GrinderCrusherScreen? stands apart in a market that's become increasingly crowded with web-only operations. As more and more of these companies pop up, customers increasingly purchase equipment that doesn?t necessarily fit their business needs. Given our place in the industry, the ability to advise our customers is GrinderCrusherScreen??s biggest differentiator. Our brick-and-mortar presence and seasoned sales representatives are a testament to our commitment to personal service and deep industry knowledge. We're here not only to make a sale but to build long-term relationships. Our customers aren't just buying a machine; they're gaining a partner dedicated to helping them make the best decisions for their business. In an era where finding experienced and reliable guidance is challenging, GrinderCrusherScreen? remains a beacon of trust and expertise. We don?t just aim to sell; we strive to be a lifelong partner for our customers, offering support and advice that only decades in the business can provide. This is the essence of our longevity and success.?

GrinderCrusherScreen? has locations in both Smyrna, GA, and Salem, OR to learn more about the company, interested parties may contact Jack Hebb. Parties can also visit the company?s website, [GrinderCrusherScreen.com](http://GrinderCrusherScreen.com), to see the company?s latest offerings of used and new construction recycling equipment.
