

Risas Dental and Braces - Arcadia Offers Orthodontic Services in Phoenix Arizona

January 17, 2024

January 17, 2024 - PRESSADVANTAGE -

Risas Dental and Braces - Arcadia in Phoenix, AZ, is a dental office that offers orthodontic services, which allow patients to transform their smile with clear aligners or braces. They have a team of licensed orthodontists who can provide the specific type of care needed by each patient. They offer various alternatives, such as braces, aligners, grin teledentistry, and retainers.

They want to point out that braces can offer other benefits aside from straightening teeth. The dentist may recommend braces to improve the patient's bite, close gaps, or relieve persistent jaw pain. While braces may indeed allow correction of various kinds of dental problems, the best outcomes include long-term oral health and an improvement in self-confidence. The patient can choose from metal or ceramic braces. Ceramic braces are a little more costly than metal braces, but they offer more comfort and they are less noticeable. In contrast, metal braces are less expensive and are more durable, and they usually require a shorter treatment period. While they are more noticeable, they can be personalized with color elastics, which is a popular practice among kids.

Risas Dental and Braces - Arcadia can also provide clear aligners, which offer a subtle alternative to braces. These aligners are thin clear, plastic trays that are tailor-fitted to the patient's teeth. As the patient wears these aligners, their teeth are gradually and gently pushed to move into their appropriate position. These aligners have become a popular choice for people of all ages due to a number of reasons, such as: appearance, comfort, removability, and results.

They also offer smile teledentistry for patients wearing clear aligners or braces. This will allow patients to have their teeth straightened and their smile improved while spending less time in the dentist's chair. Their new Grin Scope and app enable the patient to remain in constant communication with their dentist wherever they are. This results into: 50 percent less office visits; shorter treatment times; better treatment results; and more communication between patient and dentist.

Meanwhile, after the braces treatment has been completed, the patient will need to use a retainer to maintain the new position of the teeth. They will advise the patient on the appropriate retainer to use. They will instruct the patient on how frequently the retainer will need to be used and the length of time the retainer should be worn. Retainers are usually required because the teeth will try to return to their original position after the braces are removed. Retainers are needed to protect all the hard work done and the patient's orthodontic investment.

Risas Dental and Braces - Arcadia offers three kinds of retainers: Essix, Hawley, and Permanent. The Hawley and the Essix are the two most preferred types of retainers. Both can be removed and should be removed before eating, drinking liquids other than water, or brushing.

Founded in 2011, Risas Dental and Braces - Arcadia is focused on offering quality but affordable dental care and braces for the family. They assure patients that they are less costly and more financially flexible compared to other dental providers. This includes their flexible in-house payment plans and their status as a preferred in-network provider of all insurance plans. They also assure patients that they will be available to them when they are needed. They offer 24-hours emergency doctor contact and they have expanded their evening and weekend hours. Lastly, they are committed to providing quality care and customer service.

Currently, they have an overall rating of 4.7 out of 5 stars on Google after receiving more than 800 reviews. In a recent review, Katie Z. gave them five stars and said, "Amazing dentist office! Everyone is very caring from the moment you walk in and they have a payment plan so I can get new dentures after years of having no teeth."

Those who are looking for an affordable and reliable orthodontist in Phoenix can check out the Risas Dental and Braces - Arcadia website or contact them on the phone or through email.
