Royal Tree Service Gaining in Popularity in St. Petersburg FL with Unique Approach to Landscaping & Arboriculture

January 26, 2024

January 26, 2024 -
Royal Tree Service, a tree care company in St. Petersburg, FL, takes pride in its exceptional approach for arboriculture and landscaping, which makes the company stand out in St. Petersburg and neighboring areas. At the core of this is Brandon Mayhone, owner and CEO of Royal Tree, who has been passionate about nature all throughout his 15-year career. As such, the company offers a wide range of tree care services based on the principles of love for the environment. Brandon says, ?Each tree has its own story and character. Our job is to enhance and preserve their natural beauty, ensuring they continue to thrive in our urban landscape.? More about the company can be gleaned from their Facebook page at https://www.facebook.com/RoyalTreeServicesFL/.

Brandon?s love for nature started in the lush environment that he had as a native in St. Petersburg. For many years, caring for plants and trees was his hobby, until this grew into a professional business. He pointed out that it doesn?t really feel like work because he is doing what he loves to do. Stemming from his love of nature, he has made it his goal to position Royal Tree Service as a leader in sustainable tree care services.

As a result of the company?s focus on nurturing the environment, their services go beyond just maintenance. Their tree experts are knowledgeable and experienced in risk assessment to make sure that the trees will not just be aesthetically pleasing but also safe. Their commitment to eco-friendly practices and the use of the most advanced arboricultural techniques differentiates them from other tree care providers in the area.

In addition to their commitment to nurture the environment, they also believe that the business is a vital component of the St. Petersburg community. As such, they are active participants in local environmental initiatives in the city and in educating residents regarding the value of tree conservation. Brandon says, ?We believe in giving back to the community that has nurtured us. It's our way of ensuring that the beauty of St.

Petersburg is preserved for future generations.? More info about the company can be obtained from https://stpetebiz.com/dt_listing/royal-tree-service/.

The tree trimming and pruning services they provide include tree cleaning, tree raising, tree topping, hazardous limb removal, and moss removal. They will remove any weak, dead, or rubbing tree limbs and also clean out the center of the tree. This is good for tree health for airflow and benefits the whole yard by providing some sunlight to the plants and grass under the tree. Meanwhile, tree raising means they will raise the tree over driveways, houses, sidewalks, seawalls, docks, decks, etc. They provide tree topping only for soft wood trees to help in regulating the structure and growth of the tree and also to keep it healthy.

Meanwhile, some tree limbs can be regarded as hazardous because they are too close to the home, neighbors, and when they are weak or damaged and can be broken by strong winds. Another risky situation is when several limbs grow from the trunk in close proximity. Over time, the limbs can grow together, which produces a zone of failure because the outside bark is integrated into the new growth. Lastly, moss removal is important particularly for Spider or Spanish moss because these are air plants that may contain insects that can harm the tree and can block sunlight and airflow.

Founded in 2015 by Brandon Mayhone, Royal Tree Service is a professional tree and landscaping business with a personal commitment to make sure customers are 100 percent satisfied with their healthier lawn and trees. A well maintained yard, provides a beautiful landscape and adds value to the home. The company specializes in tree removal and trimming, stump grinding, landscaping, pavers, and hardscaping. While performing their daily tree services, from strategic tree removal to tree pruning, they will always make sure that the health and beauty of the city?s urban canopy is not harmed.
