

NurseRegistry Helps with Nurse Staffing for Los Angeles Home Health Agencies

January 27, 2024

SANTA MONICA, CA - January 27, 2024 - PRESSADVANTAGE -

NurseRegistry, a nurse staffing agency in Santa Monica, is pleased to announce they offer supplemental nurse staffing for home health in Los Angeles.

NurseRegistry will provide licensed and professional nurses for home health agencies with patients who may require: initial evaluations, wound care, medication management, IV infusions, and one-on-one in-home nursing care. All of these services are provided based on the patient's specific schedule and needs.

Josh Pangan, CEO of NurseRegistry, says, "Whether your LA home health agency has grown to the point where your patient intake has surpassed your available nurses or you're feeling the effects of the nursing shortage, we are here to help by providing experienced nurses. We have successfully placed per diem nurses in home health. Whether you need a nurse to open a case, do intake visits, or complete initial assessments, we have got you covered."

Home health agencies can confidently expand their service reach in Los Angeles when they partner with NurseRegistry. They are given access to more than 500 specially skilled and licensed RNs and LVNs, a committed client services team that is focused on delivering the specific staffing needs of the home health agency, and flexible scheduling for optimum patient convenience.

There are a number of distinctive factors that differentiate NurseRegistry from similar service staffing providers. First of all, they provide 24/7 scheduling, which means there are no scheduling restraints or limitations. They can cover any requirement, even when the home health agency's patient requires a nurse at the last minute. A second advantage offered by NurseRegistry is its reliability. NurseRegistry specializes in high-end nurses and takes pride in its ability to provide reliable nurses who have substantial experience in home care environments.

Josh Pangan says, "We understand the stressors that home health agencies endure when it comes to staffing high-quality nurses. Whether it is a lack of skilled and reliable nurses, or just not having any current nurses in a particular area of Los Angeles that an agency's patient may require, we are happy to assist and benefit both the home health agency and the patient."

Home health agencies that may want to know more about NurseRegistry's nurse staffing services can visit their website at <https://www.nurseregistry.com/healthcare-staffing/home-health-agencies/los-angeles/> or contact them by phone or email.
