

Kennedy Vision Health Center Moves Clinic to New Otsego Location

January 22, 2024

January 22, 2024 - PRESSADVANTAGE -

Kennedy Vision Health Center has announced that they are moving their practice in Elk River, Minnesota, to a new location. Currently located at 18157 Carson Ct NW, Suite C, Elk River, MN 55330, their new address is two miles from their original Elk River clinic, just across the Mississippi River at 9075 Quantrelle Ave NE, Otsego, MN 55330. The current Elk River location will close from January 17 to 19 to facilitate the move, and the new facility will open its doors and begin accepting patients on January 22, 2024.

"We're thrilled about the move and what that means for our patients," said Lindsey Durr, the Director of Operations for the Kennedy Vision Health Center. "Our new building in Otsego is much larger and allows us to expand our inventory and services. We will have more eyewear on display and new, cutting-edge optical equipment, meaning our patient assessments and emergency services will be more accurate and offer our patients more personalized care."

The Kennedy Vision Health Center's ability to serve its patients won't change, and there will be no interruption to their emergency eye health services during the move. The larger space means greater capacity, which will stand to benefit patients in the long run.

“One of the most important aspects of the larger space is our ability to handle increased patient volume,” said CEO and optometrist Dr. Anthony Traverse. “We have seen more appointment demand, especially in Elk River, and the larger space allows us to treat more patients per day. This is great news for our patients, because that means greater appointment availability, shorter wait times, and more meaningful one-on-one time with their doctors.”

The optical staff at Kennedy Vision Health Center emphasizes the patient experience, and their amazing eye doctors go out of their way to make patients feel comfortable to browse for frames and ask questions. Their frame collection offers options from fashionable eyewear designers for adults and children alike, including trusted designer brands like Ray-Ban®, Michael Kors®, PRADA, Oakley®, Penguin®, Nike, TOM FORD®, and more. Thanks to the larger space at their new location, this sizable collection will continue to grow.

“Our team already has a lot of fun helping patients shopping for eyewear,” said Dr. Traverse, “and now, with the beautiful new building and larger selection of eyeglass frames, that experience is about to get even better. And the staff is excited, too. Our new space is being set up just the way we want it, which has made us all feel very positive about serving patients in the new year.”

Kennedy Vision Health Center is always welcoming new patients.

About Kennedy Vision Health Center

Kennedy Vision Health Center was founded in 1974 to provide patient-oriented eye care to the people of eastern Minnesota. Their practice offers a wide range of optical and eye health services, excellent pediatric and family-oriented eye care, and emergency services for urgent conditions like physical injuries, scratches, and more. Their optical specialists, patient ambassadors, optometric technicians, and optometrists are all carefully selected for their knowledge, skill, and ability to communicate closely with patients and put them at ease. They also put a heavy emphasis on acquiring the newest state-of-the-art technology, which allows them to offer ultra precise eye examinations and treatments. By focusing on advanced tech and a friendly, experienced staff allows Kennedy Vision Health Center to provide the kind of high-quality care they would give to members of their own family – which is great because to them, their patients are family.
