

Florida Orthopedic Surgeon William F Bennett M.D. Receives International Recognition

December 22, 2015

December 22, 2015 - PRESSADVANTAGE -

William F Bennett, M.D., of Bennett Orthopedics and Sports Medicine in Sarasota, FL, is proud to announce that his 2003 research paper, "Arthroscopic Repair of Massive and Contracted Rotator Cuff Tears: A Prospective Cohort with 2 to 4 Year Follow-Up", evaluated along with other research papers, from 2003 to 2014, on the topic by "Arthroscopy: The Journal of Arthroscopic and Related Surgery, Vol 31, No 12, December 2015," was found to be one of the two best on the subject based on study design, the level of evidence and quality.

Dr. Bennett's peer-reviewed article reported upon Dr. Bennett's own patients' surgical outcomes for arthroscopic repair of massive rotator cuff tears at 2 - 4 years after surgery. Dr. Bennett is gratified and honored by the recognition. Having been a member of the editorial board for that very same journal for five years, he is well aware of the rigorous scrutiny and review that the articles published in the journal face.

In an article in the same issue of "Arthroscopy: The Journal of Arthroscopic and Related Surgery," on a related subject, "Utilization and Costs of Postoperative Physical Therapy After Rotator Cuff Repair: A Comparison of Privately Insured and Medicare Patients," it was determined that Dr. Bennett's patients outcomes for rotator cuff repairs fare measurably better than the norm. The article found that over 80% of privately insured and over 40% of Medicare patients are still undergoing physical therapy after six months, whereas almost none of Dr. Bennett's are.

Dr. Bennett is an esteemed, experienced Sarasota orthopedic surgeon, internationally known as an expert shoulder and knee specialist. Designated one of the Top Orthopedic Surgeons in Sarasota by U.S. News and World Reports, Dr. Bennett has been practicing since 1995. As a sports medicine physician, he treats all injuries but has been a pioneer in the areas of shoulder surgery, adult stem cells, and platelet rich plasma ("PRP") treatment of joints. He sees patients from various parts of the world who seek his advanced expertise in treating hip, knee, elbow, and shoulder injuries. Arthroscopic rotator cuff surgery, minimally invasive custom knee replacement, cartilage regeneration, meniscus surgery, ACL reconstruction and hip arthroscopy are common procedures performed by Dr. Bennett.
