

Bare Medical Spa + Laser Center Named a Top 10% Nationwide Morpheus8 Provider

February 22, 2024

Burlington, Vermont - February 22, 2024 - PRESSADVANTAGE -

Burlington, VT ? Bare Medical Spa + Laser Center has been distinguished as 71st out of over 8,000 Morpheus8 radiofrequency (RF) microneedling providers nationwide, a remarkable achievement that not only places them in the top 10% but also secures their position in the elite top 1%. This outstanding achievement not only demonstrates Bare's excellence in providing cutting-edge treatments but also underscores their position as a leader in the industry.

The practice brought on the device in March of 2023, quickly earning a loyal following amongst patients looking to regeneratively improve the look and feel of their skin with the versatile treatment. The device is noted for its skin tightening benefits and long-term results for the face, neck, décollete, and body, as an advanced option for patients looking for more significant results. With the announcement, Bare reaffirms their commitment to helping patients and occupying a place as one of Burlington?s premier destinations for self-care and aesthetics.

?We?re so honored and excited to be named as a top provider of Morpheus8,? said founder and owner of Bare, Jamie Spano. ?We can assist numerous patients with a variety of challenging conditions on both the

face and body. This includes improving skin tone evenness, boosting collagen and elastin production, reducing stretch marks, and treating skin laxity, which are all issues that are often hard to address without surgery. It's so heartening to see how our patients' confidence improves over time, all with the help of radiofrequency microneedling.

The Morpheus8 is a collagen induction therapy device that can be used on various areas of the face and body. It combines principles of microneedling – triggering the body's healing process by using tiny needles to create micro-lacerations that induce collagen and elastin production – with RF thermal energy. Collagen and elastin are present in the skin, responsible for its firmness and bounce, but their production diminishes with age, certain conditions, stress, environmental factors, smoking, and other causes.

The RF energy enables the device to penetrate the deeper layers of the skin, stimulating cellular repair, restructuring the skin and fat, and causing the skin to heal itself, resulting in improvements in texture and tone. As a result, the skin is totally rejuvenated with minimally invasive treatment.

"It's so important to us at Bare to bring our patients the finest service possible backed by state-of-the-art technology," continued Spano. "The versatility of the Morpheus8 is impressive, enabling us to achieve a wide range of benefits for our patients. Our ability to customize treatments allows us to create results that are tailored specifically to each individual's needs. It's incredibly exciting to be acknowledged for this work."

Morpheus8 is manufactured by InMode, who announced the list of top providers. The device quickly became noted for its ability to tighten the skin non-surgically, quickly becoming popular at medical spas where such treatments can garner a dedicated fanbase for their effective results. The treatment is also distinguishable from many laser devices due to its ability to treat all skin types and tones, something not possible with all laser wavelengths, as it uses radiofrequency energy instead.

"As we move into the spring of 2024, I can't wait to keep helping our wonderful patients by delivering stunning results with RF microneedling," added Spano. "People are becoming more familiar with it and it's one of the best possible tools to have on your side as you age for glowing, smooth skin."

Bare Medical Spa + Laser Center is open and taking appointments for new and existing patients.

About Bare Medical Spa + Laser Center

Overlooking beautiful Lake Champlain, Bare Medical Spa + Laser Center is renowned for their technologically advanced offerings that span a wide range of skin and aesthetic treatments. Founded by Jamie Spano in 2012, the practice originally started as a laser center and grew to become one of Burlington's top destinations for innovative laser treatments and high-quality aesthetics services. Its location and reputation

for exceptional results has helped Bare define itself more luxuriously, with a commitment to wellness that is expanding and an ever-inclusive environment that lets all Burlington residents and visitors feel welcome.
