

The #1 Resveratrol Best-Seller in Amazon Offers 100% All-Natural Way That May Protect the Heart

December 28, 2015

December 28, 2015 - PRESSADVANTAGE -

A resveratrol product that hit #1 bestseller in Amazon offers a 100% all-natural way to help people avoid cardiovascular diseases and maintain a healthy heart-- a timely alternative prevention to an alarming health condition that takes countless lives annually.

Bri Nutrition Top Rated Extra Strength Resveratrol hit the #1 bestseller in Resveratrol spot in Amazon on April 2015, as well as in two other separate categories-- #1 bestseller in Calcium Ascorbate and #1 bestseller in Grape Seed Extract. The product manufactured by California-based natural health supplement firm, BRI Nutrition offers people an all-natural approach to avoid the risks of heart diseases.

More than Just a Bunch of Grape Seeds

Thomas Steven Lamont, Bri Nutrition Sales & Marketing Head said that the product was made following an extensive research revealing the health potency of pure Resveratrol, as well as reviews of studies and

researches accumulated over the years from various health groups and professionals.

“However, the company decided to take it further and added other rich ingredients to maximize its effects. We don’t want to offer just another Resveratrol product made only of grape pulps, juices and seeds put in a jar. We wanted a product that actually stands to its claims and help people get the most out of this important ingredient,” Lamont added.

Other all-natural ingredients found in Bri Nutrition Extra Strength Resveratrol are added to deliver each milligram of Resveratrol efficiently.

Resveratrol Effects on Cardiovascular Diseases

Various studies suggested that moderate red wine consumption may help reduce the risk of cardiovascular diseases, at least partly due to the presence polyphenols. An article published in the Cardiovascular Drug Review in February 2004 says, “Polyphenols have a multitude of biological activities. Their antioxidant, free radical scavenging properties, and their ability to interact with the pathway leading to the generation of NO from vascular endothelium are relevant to cardioprotection.”

The attention drawn to the study of the effects of Resveratrol in red wine is attributed to the so-called “French paradox”—a significantly low mortality rate caused by coronary heart disease in France despite the French’s high-fat diet and smoking habits.

Clamor for High-Quality Resveratrol Products

Following studies, researches and articles citing the advantage of using Resveratrol-based products and supplements, many people began searching the market for high-quality Resveratrol supplements.

Bri Nutrition Extra Strength Resveratrol catches the interest of many due to its all-natural, extra pure, high potency micronized vitamin supplement from Polyphenols. Bri Nutrition also has the reputation for high-quality natural health supplements that are manufactured according to strict FDA standards.
