

AeroStar and AeroCadet Forge Strategic Alliance to Enhance Pilot Training Programs Globally

March 14, 2024

March 14, 2024 - PRESSADVANTAGE -

AeroStar Training Services LLC has entered a strategic alliance with AeroCadet, a recognized authority in the aviation arena for pilot training and career development in aviation. This collaboration aims to augment the wide array of pilot training expertise that both entities currently offer. Through this partnership, AeroStar and AeroCadet strive to make a pronounced impact on the global aviation community by offering students an all-inclusive set of resources to kickstart and advance their pilot career.

Established in Florida in 2008, AeroStar Training Services has made a name for itself by providing a range of top-notch pilot training programs. As an FAA Certified 141 & 142 Training Center, AeroStar's offerings span from the initial pilot training, Airline Transport Pilot (ATP) Certification Training Programs, right up to specific aircraft type-rating courses for the Airbus A320 and Boeing B737. For more information about these programs, visit AeroStar Training Services at their website. The company is set apart by its extensive training curriculum that can effortlessly transition a student with no flying hours into an ATP CTP certified professional, with a type rating.

David Santo, the CEO of AeroStar Training Services, noted, "Our partnership with AeroCadet is a substantial step forward in fulfilling our commitment to offering unrivaled guidance, resources, and support throughout a student's training journey. AeroCadet's global reach and expertise in international pilot training seamlessly complement our strength in advanced simulator-based type-rating training."

AeroCadet, meanwhile, has made a mark in the aviation sector by having a strong focus on international student programs. Their programs span from beginner-level programs for Indian students, modular courses, to license conversion programs. They have successfully created a budget-friendly route to employment with top-tier airlines via wholly integrated flight training programs that guarantee pilot internships.

The CEO of AeroCadet stated about their cooperative effort, "Our alliance with AeroStar enhances the range of pilot training options in meaningful ways. It ensures that students enjoy a broad and advanced learning experience. Importantly, this collaboration is equipped to help prospective pilots achieve their airline career

objectives adeptly."

The global aviation industry is presently grappling with a dearth of pilots. This partnership arrives as an opportune solution to this void, offering a potent combination of AeroCadet's global aviation career planning and AeroStar's superior advanced simulator-based type-training services. Students have now been granted access to a comprehensive array of training across the aviation spectrum, while receiving expert guidance during their academic journey.

Both organizations have pledged to provide financial, medical, and immigration assistance to students, equipping their academic sojourn with sizable resources. Elucidating the perks of the partnership, David Santo added, "This association is about making dreams come true with the finest support system. It's the most comprehensive package one can avail in this sector."

This alliance denotes a significant landmark not only for AeroStar and AeroCadet, but also for all future airline career professionals globally. More information on the wide-ranging series of training programs can be found on the websites of AeroStar Training Services and AeroCadet.
