

# Xcede Launches Specialist Ai Recruitment Division to Innovate Global Talent Solutions

*March 18, 2024*

LONDON, UK - March 18, 2024 - PRESSADVANTAGE -

Xcede, an internationally renowned technology recruitment specialist, is excited to declare the formation of a dedicated AI and Machine Learning subsidiary. This key decision helps augment Xcede's recruitment fields of expertise, currently spanning Data, Product, Software, Cloud, and Cyber Recruitment, in response to the rising needs in the swiftly changing tech landscape.

Boasting over a decade of experience, Xcede has positioned itself as an essential player in AI recruitment on a global scale. The company's specialties encompass Machine Learning, Natural Language Processing (NLP), and Computer Vision, among other developing tech areas within the broad spectrum of Artificial Intelligence. The decision to inaugurate an exclusive AI department stems from the rapid advancement of this tech niche and the opportunity to offer ingenious recruitment solutions for businesses worldwide. More information is available via the company's official website at <https://www.xcede.com/>.

In addition, the newly-formed AI division will facilitate networking events with a focus on knowledge exchange. Invited speakers from leading AI entities will have the opportunity to network with a varied talent pool, creating valuable connections between innovative employment providers and proficient professionals.

"Xcede embodies innovation and superiority in recruitment, reflected in our decision to establish the AI and Machine Learning division," remarked Xcede's Global Managing Director, Adam Blaney. Known for his noteworthy leadership record in providing quality recruitment solutions, his further insights can be explored on his profile at <https://www.xcede.com/consultants/adam-blaney>.

Adam Blaney continued by emphasizing that Xcede's expansion is fueled by high-reaching client and candidate requirements. By understanding these needs, Xcede skillfully addresses shortages in AI Engineering, Generative AI, AI Product Management, among other tech areas within AI and Machine Learning. Xcede is enhancing their recruitment services, refining the approach businesses employ to identify,

attract, and retain premier AI specialists amid rising competition.

Adam Blaney further commented "Our expert team employs our longstanding AI knowledge to carve a smarter, more resourceful, and effective future for recruitment. The ongoing expansion of our recruitment frameworks echoes our mission and commitment to be at the forefront of providing transformational worldwide talent."

Simultaneous to this growth, Xcede continues to provide a supportive recruitment environment that fosters career progression from trainee level to high-level management. With attractive benefits including global travel experiences, Xcede develops a conducive culture that underpins their business triumph.

The unveiling of the specialist AI division is a momentous phase in Xcede's journey, bolstering its position as a global technology recruitment specialist. For a more detailed overview of the services offered, please visit Xcede's website.

Finally, Janan Gok expressed, "Our unwavering commitment is to serve the rapidly evolving tech landscape with inventive, fast and effective recruitment resolutions. Our innovative AI & Machine Learning specialty will fortify our services and impart additional value for our clients and candidates."
