

Go Industries Announces Grille Guard Solution For Chevrolet C6500 and C4500

March 18, 2024

Richardson, TX - March 18, 2024 - PRESSADVANTAGE -

Go Industries is now offering their innovative solution for grille guard installation on Chevrolet C6500, Chevrolet C4500, Ford F650, Ford F750 and International CV515 trucks. These robust vehicles are commonly used commercially, in fleet use, as tow trucks and by emergency services. They are used by utility companies, fire departments, towing companies and government agencies. Their forward opening hood designs make the installation of a traditional grille guard impossible because it would prevent the opening of the hood. Go Industries has solved that problem with their forward tilting design that implements OEM style latches with locking mechanism on both sides of the grille guard. The grille guards also accommodate a winch tray that will hold up to a 16.5k winch.

The revolutionary forward tilting grille guards by Go Industries are available for Chevrolet C6500, Chevy C4500 and International CV151 trucks years 2024, 2023, 2022, 2021, 2020 and 2019. They are available for Ford F750 and F650 trucks for the 2016 through 2024 model years.

A spokesperson for Go Industries mentions, "Many fleet owners, fire departments, government agencies and commercial vehicle owners of Chevy C4500, Chevy C6500, Ford F650, Ford F750 and and International CV515 medium duty commercial trucks are not aware that there is a front end protection grill guard system for their trucks. Go Industries medium duty grille guards are designed for these trucks and their forward opening hoods, which before Go Industries made installing a grille guard impossible if one ever wanted to open the the hood for maintenance such as oil changes. The innovation and quality craftsmanship of our International CV515 grille guard ensures that no cutting or drilling is required for installation. These have been designed with a secure mount in mind, enabled by an OEM-style two latch locking mechanism, complete with safety pins. In addition, Go Industries grille guards for forward tilting hood these models allow for a winch to be mounted."

Go Industries? winch-style grille guards are suited for Chevy medium-duty 4500 to 6500 trucks, and they

require no cutting or drilling for installation. This makes the installation process easier and less costly and allows the guards to seamlessly blend with vehicle design. The grille guards have been designed with tilt bodies in mind and will articulate forward for easy hood access. The piece can also be easily adjusted or removed with two OEM-style latches - one on each side - that match the style and functionality of the manufacturer's original latching mechanisms. Because they are compatible with the truck's existing mounting points, these latches can be relatively easily installed as replacements for the factory-installed grille. The security and adaptability of the OEM-style latches are augmented with safety pins to ensure a close-fitting, secure mount. The pins provide additional security to counterbalance the grille guard's forward articulation, preventing unintended movement and acting as a locking mechanism to keep the guard in position when adjusted.

Go Industries, Inc. has been providing fleet, truck, and law enforcement accessories in and around Richardson, Texas since 1978. The company is an automotive accessory manufacturer specializing in grille guards. They initially offered grille guards to workmen to help them protect the tailgates of their pickup trucks, but today their product range has expanded to include bed rails and headache racks as well. Since its founding Go Industries has remained committed to offering the best products, services, and custom solutions for their customers. This latest Ford F750 grille guard initiative strengthens their legacy of innovation and customer satisfaction in the trucking industry, showcasing their capacity for sustained growth and improvements that are responsive to evolving customer needs and technological advancements. Go Industries' ongoing commitment to quality, innovation, and customer service solidifies its status as a leader in the truck accessory and law enforcement equipment industry.
