

MP VEERA MD PA Introduces G POEM Procedure, Offering New Hope for Gastroparesis Patients

April 22, 2024

April 22, 2024 -

MP VEERA MD PA, is thrilled to announce the adoption of the innovative G POEM Procedure into his comprehensive range of treatments for digestive disorders in Upstate South Carolina. This innovative G POEM Procedure, emerging as a pivotal treatment for Gastroparesis, signifies a considerable breakthrough for individuals afflicted by this complex gastric motility issue. Gastroparesis is characterized by numerous troublesome symptoms, including nausea, vomiting, a sense of early fullness, bloating, and potentially weight loss. Traditional approaches, including diet modifications and medication, often do not suffice, highlighting the urgent need for novel interventions such as the G POEM Procedure.

Gastroparesis significantly burdens sufferers, influencing numerous aspects of life due to its incapacitating symptoms. In response, the G POEM Procedure emerges as a hopeful solution. This technique, acknowledged for its minimally invasive nature, is performed under general anesthesia and focuses on a precise split of the pyloric sphincter muscle to enhance stomach emptying. Latest research extols the G POEM Procedure for substantially diminishing symptoms of Gastroparesis in about 80% of patients, demonstrating its effectiveness and potential as a durable remedy.

"The G POEM Procedure represents a major step forward in our ongoing mission to provide state-of-the-art treatments for individuals grappling with Gastroparesis," remarked Dr. Veerabagu. "Integrating this progressive procedure underlines our commitment to advancing patient care through the incorporation of the newest technological breakthroughs. It illustrates our dedication not just to improving our patients' health, but also to easing the hardships of dealing with such a demanding illness."

In conjunction with the G POEM Procedure, Dr. Veerabagu and his team are devoted to offering a broad array of services designed to diagnose and treat a diverse range of digestive issues. Employing advanced technology and methods like non-surgical weight management, Endoscopic Ultrasound (EUS) guided treatments, Advanced ERCP and Spyglass, along with Endoscopic Mucosal Resection (EMR) &

Endoscopic Submucosal Dissection (ESD), the practice exemplifies a holistic approach to patient care.

"We carefully assess every breakthrough in gastroenterology, and the adoption of the G POEM Procedure into our practice is reflective of this thoroughness," Dr. Veerabagu emphasized. "This procedure offers an exciting alternative to the traditional therapies, which many find insufficient. Moving forward, we remain committed to our mission of delivering personalized, efficacious treatment plans that account for the digestive system's complexities."

Patients and caregivers seeking further information about the G POEM Procedure and Gastroparesis are encouraged to explore the resources accessible through Dr. Veerabagu's online platform. The website not only provides education on the symptoms, causes, and prevalent treatments for Gastroparesis but also introduces the extensive services available at the practice. It extends an invitation to individuals everywhere to discover advanced treatment avenues that could significantly enhance life quality amidst the rigors of digestive diseases.
