Chef Limited Launches New Ceramic Knives

December 30, 2015

December 30, 2015 -
Chefs Limited, a business in High Point, NC, has announced the addition of two new products to their line up. One of these is the three piece ceramic knife set, which comes in a beautiful gift box with magnetic lid. The other product is an 8" ceramic chef's knife, which comes in a similar box. Both products are already proving to be very popular.

"We stand for quality and functionality," says Shawn Stanton from Chefs Limited. "Our goal is to bring you stylish and fashionable kitchenware that will enhance your kitchens decor, while helping to make your cooking experiences as pleasurable as possible."

The ceramic knives set includes three knives, which are the 4" Pairing Knife, 5" Utility Slicing Knife, and the 6" Chefs Knife. These have white handles and black blades. This 3 piece ceramic knife set can be found at http://www.amazon.com/dp/B017G958FO. Each blade also shows the Chefs Limited logo. Ceramic blades are known for their sharpness and many people never go back to different types of blades once they have tried them. Those who want something even larger are encouraged to purchase the single 8" knife, which is also made of ceramic and of the same design and quality as the set itself.

Both products, while only recently released, are proving to be incredibly popular already. "It is super sharp,

and cuts through items with ease," says Danielle R. on the 8" knife. "The dark blade with the white handle makes this a very handsome and appealing knife." Meanwhile, Rachel B said: "Fantastically made 3 piece Ceramic Knife Set. Three sizes; 6 inch, 5 inch and 4 inch- versatile for everyday use. I think that this white handle set by Chefs Limited is made with high quality craftsmanship, attention to fine details and is presented beautifully in a sturdy gift box with magnetic closure." The 8? ceramic chefs knife can be seen at http://www.amazon.com/dp/B017GAJ4UI.

Ceramic knives offer a number of clear benefits, which go a long way towards explaining the popularity of this set. They are lightweight, they don't leave a metallic taste or smell, they are non-corrosive and resistant to various acids and oils, and they are easy to clean. Additionally, being made of Zerconia, they are twice as sharp as steel, while having anti-slip technology included to make them safer.
