

## **Celebrating a Decade of Excellence: Custom Rub On Transfers Marks 10 Years of Innovation and Quality**

*April 22, 2024*

April 22, 2024 - PRESSADVANTAGE -

Custom Rub On Transfers, renowned for its innovative approach to producing custom dry rub-on transfer lettering and designs, is commemorating its 10th year in the industry. Initiated to provide a variety of products aimed at meeting the specific needs of its clientele, the company has become a much more refined alternative to traditional Letraset, waterslide decals, and vinyl stickers, offering services such as custom-colored matches and finishes, complimentary shipping across the USA and Canada, along with support for numerous file formats to deliver print-ready results. Over the last decade, Custom Rub On Transfers has earned a reputation as a trusted partner for both businesses and individuals seeking high-quality, tailored rub-on transfer solutions.

In reflecting on the company's 10-year milestone, Charles Platon, the CEO of Custom Rub On Transfers, emphasized the significance of this achievement, stating, "Reaching the 10th anniversary is a significant achievement that reflects our dedication to quality, innovation, and customer satisfaction. From the beginning, the company's focus has been on providing a product that meets the exact needs of our clients, whether they're looking for intricate designs, specific colors, or specialized finishes. We're grateful for the trust our customers have placed in us over the years and look forward to continuing to serve them with the same level

of excellence."

A key aspect that distinguishes Custom Rub On Transfers in its market is the company's commitment to producing custom rub on transfers of exceptional quality. The transfers provided by the company possess a flawless application on surfaces of any color without necessitating water or transfer tape and eliminating the issue of clear film residue commonly associated with waterslide decals or labels. Additionally, the company is capable of supporting large format and high-resolution transfers, with the availability of decals and film negatives in sizes reaching up to 18x24 inches. The utilization of high-density 2400 DPI film ensures the clarity of text and the intricacy of graphics.

In line with their dedication to customer convenience, Custom Rub On Transfers has introduced a sheet size calculator on their website. This innovative tool aids clients in the planning of their projects by determining the number of transfers, logos, graphics, or icons that can be accommodated on a sheet. Moreover, the company offers an expedited shipping service, providing free 2-day delivery within the continental US and 5-6 days shipping to Canada, with next-day delivery available for urgent requests.

"We've experienced growth over the past decade, continually expanding our products to meet the evolving needs of our clients. As we celebrate this milestone, our commitment to custom lettering excellence remains unwavering. We are always looking for ways to enhance our offerings and streamline our processes to ensure our customers receive nothing but the best," Platon further commented.

Looking ahead, Custom Rub On Transfers remains optimistic about its future, aiming to preserve its leading position in the custom rub-on transfer market. By prioritizing customer satisfaction and incessantly pursuing innovation and improvement, the company is poised for sustained success and expansion in the forthcoming years.
