

Hike Metal Leads in Custom Boat Manufacture, Spotlighted in Inside Marine

May 06, 2024

Wheatley, Ontario - May 06, 2024 - PRESSADVANTAGE -

Hike Metal, positioned at the forefront in the realm of custom boat manufacturing and nestled in the heart of Wheatley, Ontario, Canada, has recently been cast into the spotlight through an in-depth article featured in the latest edition of Inside Marine magazine. This acknowledgment paints a picture of the company's rich six-decade journey and its forward-thinking approach in catering to the diverse needs of the boating industries.

Recognized as a distinguished shipbuilding company in Ontario, Hike Metal prides itself on its adept skills in constructing superior vessels designated for a plethora of sectors including the Fishing Industry, Transportation, Tourism, Ocean Protection, Research, and Emergency Services, to name but a few. The company's unwavering dedication to delivering excellence is showcased through its customized services that adeptly address the distinct requirements of each boating industry it serves.

The attention garnered by Hike Metal in Inside Marine illuminates the various initiatives and the breadth of

expertise this company infuses into the shipbuilding sector. Celebrated for its prowess in concocting bespoke solutions that align with the rigorous demands of its clientele—which spans across the RCMP, Police, and Fire Departments throughout North America—Hike Metal is well-equipped with a 100-ton travel lift and around-the-clock emergency services. This ensures the company's readiness to tackle any client needs expediently, be it for refits, repairs, or complete vessel fabrications. Such agility and commitment to quality fortify Hike Metal's status as a reliable ally within the boating industries. To learn more about Hike Metal and the services they offer, you can visit their website directly.

Steve Ingram, a representative from Hike Metal, expressed his views regarding the company's feature in Inside Marine, stating, "Being recognized in such a prestigious publication acknowledges the concerted efforts and dedication of our entire crew. At Hike Metal, we take pride in our dexterity to evolve and pioneer amidst the challenges that pervade the industry. This feature not only honors our past accomplishments but also paves the way for future endeavors as we persist in engaging the boating industries with unmatched proficiency."

Hike Metal's ideology towards shipbuilding is all-encompassing, covering an array of services including dockside facilities for refit and repair, comprehensive 4-year hull inspections, and fabrications catering to a wide variety of vessels. From crafting ferries, hovercrafts, and water taxis within the Transportation sector to constructing cruise vessels, whale watchers, and jet boats within Tourism, Hike Metal's project catalog is both expansive and remarkable. Furthermore, the company plays a pivotal role in Ocean Protection by producing cape and bay class vessels and in Research through developing survey and hydrographic vessels.

Ingram further underscored the significance of catering to diverse boating industries, "At Hike Metal, we grasp the notion that each client possesses unique needs. Our capacity to customize our offerings to meticulously meet the requirements of the boating industries we serve distinguishes us. We are devoted to perpetuating our legacy of superlative quality and innovation in every endeavor we embark on."

For those intrigued by Hike Metal and its myriad of services, the feature in Inside Marine provides a thorough exploration of its achievements and vision for the future. As Hike Metal ventures ahead, it is resolute in sustaining its position as a preeminent shipbuilding company in Ontario while continuing to furnish the boating industries it serves with superior solutions.
