New Large Size Organic Castor Oil Bottle Released

February 09, 2016

February 09, 2016 - PRESSADVANTAGE -

Cammile Q is proud to announce the launch of their organic castor oil in a 4 oz bottle. The company has already been marketing their 1 oz bottle, which has proven to be very popular. They expect similar results for the larger bottle. The new, larger bottle can be obtained through Amazon.

"Our castor oil is 100% organic and designed to provide various health benefits to the user," says Sarah Davis from Cammile Q. "Castor oil is known to assist in hair growth, and also as an excellent remedy for skin conditions such as acne. Our 1 oz bottle is very popular, but we felt that it was time to release a slightly bigger one as well. We're happy to see people like it already."

The product has been designed to enable people to have thicker, healthier hair. This oil is not only used for hair, but also for eyebrows and eyelashes. Many people have noted that, ever since they have started using the product, they have also received compliments regarding their hair, eyelashes and eyebrows again. This is believed to be due to the moisturized and shiny look that the castor oil creates.

The company encourages everybody to 'Like' them on Facebook through <https://www.facebook.com/cammileq>, where they can leave photographs and comments on their experiences with the oil and whether or not they prefer the larger bottle. "Oh my brows are coming back," says Tera.

"Ladies and gents with thinning eyebrows, don't even hesitate. Buy this product and experience awesome results. I use it nightly. I've only just started it so not sure how long I will do the treatment but one thing is for sure, I really love this product."

Castor oil is now widely used for growth of eyelashes and eyebrows, and more and more people are becoming aware of the benefits of the oil.

As can be seen on the company's website at <http://cammileq.com/>, it has been found that the oil has been used safely on the hair roots, eyelashes and eyebrows, as it is 100% pure and natural. It is certified USDA organic, which further demonstrates that it contains no harmful products. The oil is proving to be incredibly popular with people raving about its benefits.
