

Kennedy Vision Health Center to Host Massive Frame Sale Event

April 19, 2024

April 19, 2024 - PRESSADVANTAGE -

Plymouth, MN, 4/19/2024 ? Kennedy Vision Health Center is excited to announce a significant eyeglasses frames sale event on May 16. From 1pm to 6pm, visitors can enjoy a 40% discount on all frames in the store. Held at 10600 Old County Rd 15, Plymouth, MN 55441, the sale, titled "Introducing a New Line of Luxury," will feature top brands such as Jimmy Choo, Tiffany, and Prada, showcasing the center's commitment to luxury, style, and quality in eye care.

"We're so excited to show our community the expanse of what luxury can look like in the present day," said Dr. Anthony Traverse, CEO and optometrist at Kennedy Vision Health Center. "Our patients are discerning, and they want quality, something we're proud to always deliver. With brands like Jimmy Choo being some of the main attractions at the sale, we've got this very desirable combination of craftsmanship, style, and individuality that lets patients explore with their eyewear and really show off their individual taste."

The practice will be providing refreshments at the all-day event. Customers are encouraged to RSVP, though it is not required.

"By having the sale for all our frames rather than just featured brands, we're letting people top up on their eyewear for the season and giving them the opportunity to try something new," continued Dr. Traverse. "You can make a fashion statement and save while doing it."

The sale will also feature side tables to promote the "We Love Eyes" range of cosmetics designed specifically for sensitive eyes, as well as the range of vitamins and supplements sold at Kennedy Vision Health Center. This includes the intensively studied EyePromise brand, which has shown substantial clinical results with antioxidants like lutein and zeaxanthin. We Love Eyes has made waves in the industry with its oil-centric formulations and usage of Australian tea tree oil, which is commonly used in products to address demodex mites which can cause oil production dysfunction and eyelid inflammation, known as blepharitis.

Part of why we love the We Love Eyes range at Kennedy Vision Health Center is because they've got these beautiful, naturally-derived formulas that prioritize your eye health and comfort," added Dr. Traverse. From their oil-based makeup remover that preserves lash extensions to the Style Cleansing System, their products make caring for your eye health and hygiene at home easy and elegant. With the nutraceutical side, we want to really drive home to patients that your eye health is essential and can be maintained with good practices and nutrition. We want to cover the depth of their importance: you've got your vision prescription and your lenses set, so let's go further to tackle your eye health and how they're looking and feeling beyond your vision.

Kennedy Vision Health Center is open and taking appointments for new and existing patients at all their locations.
