

Video On How To Use HD Pen Recorder For Winter Photography Released

January 04, 2016

January 04, 2016 - PRESSADVANTAGE -

Catonsville, Maryland business Ron's Amazing Products has recently added a new video to their YouTube channel that is designed to show people how to improve on their winter photography skills specifically, although other photography tips are also included. They want to ensure their subscribers and viewers are able to take advantage of the season to take excellent photographs. The video is available through <http://www.youtube.com/user/RonsAmazingProducts>.

"The winter season is such a beautiful one with tremendous changes in nature and more," says Ronald Hoff, founder and owner of Ron's Amazing Products. "However, it can be very difficult to capture these images, not in the least because of the low-lying sun. Our video gives people great tips on how to get the most out of their camera to take truly fantastic pictures of this gorgeous season."

The tips highlighted in the new video can also be applied to the HD pen recorder and camera that Ron's Amazing Products provides. This camera is available through the company's website on <http://ronsamazingproducts.com>. This spy camera is proving to be very popular because, unlike many other models on the market, it actually takes high quality HD videos and pictures. Additionally, it has a very large

built in memory, so people can take multiple pictures.

People have been appreciating the quality of the HD camera pen for some time. "I am a gadget lover and have a small photography obsession," says Ocean W. "I love taking pictures of anything, anywhere and always seem to run into the same problem. My cameras are too large to carry in my purse, and my phone either runs out of space, or takes low quality photographs/videos. I can clip this pen to my shirt, or slip in in my handbag for easy carrying. It would have been neat if a small bag was included with this. Taking videos was fun and easy ... the best part was, no one knew I was doing it."

The pen camera can be purchased on Amazon through <http://www.amazon.com/gp/product/B00G2TEKM2>. People are encouraged to watch the new video to get the most out of their camera.
