

Atlas Spinal Care Launches Brand New Website

January 01, 2016

January 01, 2016 - PRESSADVANTAGE -

Atlas Spinal Care, a chiropractic clinic in Upland, CA, is proud to announce the launch of their brand new website. The site has been completely redesigned to become fully interactive and far more user friendly. The new website also clearly describes the clinic's unique approach to helping people.

Dr. Tymothy L. Flory, owner of Atlas Spine Care and Board Certified NUCCA Chiropractor says: "Our new site is interactive and user friendly, but most importantly it easily describes what we do, which is help people feel better than they have in years and get their lives back."

The doctors of Atlas Spine Care are chiropractors that specialize in the craniocervical junction. This means that they help people who suffer from migraine headaches, tension headaches, vertigo, TMJ and jaw pain, facial pain, concussion injuries, whiplash, and neck pain. The new website clearly explains details about the clinic's focus on head and neck problems.

The new website, which can be accessed through www.AtlasSpinalCare.com, clearly demonstrates that the clinic aims to help people to feel better and live bigger. They understand the impact of pain, and how it can limit people's overall quality and enjoyment of life. They want to make sure people are empowered to get their own lives back.

The clinic prides itself on being honest towards their patients. They assure that they will know whether or not they can help someone on their first appointment, and will refer all of those whom they are unable to help. Additionally, they promise that all patients will see improvement in their condition within 8 weeks, or they will find a better solution. All services are delivered gently and, most of all safely, and all clinicians are fully committed to their professional development, always remaining up to date with the latest and most cutting edge technology, including the current standard of the NUCCA procedure.

People are encouraged to visit the new website for more information and to book a complimentary, no obligation consultation. These consultations are designed to be conversations, not commitments. Essentially, it is an opportunity to discover what the clinic is about, what the physical issues are and whether or not help is available to take care of that issue. The consultation can be booked online through the easy to use contact form on the site.
