

Concertium Unveils Enterprise-Grade Security and Expert Guidance for Businesses

June 17, 2024

June 17, 2024 -
Concertium, a leading cybersecurity company with nearly 30 years of experience, has announced a new initiative to deliver top-notch security and expert guidance for businesses. The company specializes in various cybersecurity aspects and offers a range of services to protect data and systems, helping organizations maintain strong defenses against threats.

Concertium provides a comprehensive suite of services, including its award-winning Collective Coverage Suite (3CS), Managed Cybersecurity Services, Consulting & Compliance, and Managed IT Services. These services are tailored to meet the unique needs of businesses, focusing on timely and effective solutions to safeguard sensitive information.

The Collective Coverage Suite (3CS) is central to Concertium's offerings. This service includes real-time threat detection, automated network threat eradication, and post-breach management. It uses AI-enhanced tools to offer a clear view of an organization's network, allowing quick identification and handling of potential

threats. The suite also features breach monitoring and alerting services to detect risks early, ensuring any breach is managed efficiently.

"Concertium?s 3CS is a vital tool for any business looking to strengthen its cybersecurity," said Robert Atherton, CEO of Concertium. "Our technology integrates real-time detection and automated threat eradication, making it a strong layer of protection against cyberattacks."

Alongside the 3CS, Concertium's Managed Cybersecurity Services enable businesses to focus on their core operations while trusting Concertium with their cybersecurity needs. These services include managed detection and response, network and firewall management, cloud security, email and collaboration security, application security, security awareness training, cyber incident response, vulnerability risk assessment, and vulnerability scanning & remediation.

The company's Consulting & Compliance services give businesses essential advisory and support, including compliance advisory, incident management, virtual CISO, cyber insurance compliance, third-party audit readiness, and penetration testing. These services help companies navigate the complex landscape of regulatory requirements like HIPAA, GDPR, and PCI DSS, assisting them in reducing risks and avoiding severe consequences from potential security breaches.

"Compliance is a big part of cybersecurity today. Our Consulting & Compliance services ensure that businesses not only meet but exceed regulatory obligations," said Robert Atherton. "By working closely with our clients, we help them address their compliance needs, protecting their reputations and operational integrity."

Concertium also offers Managed IT Services, crucial for streamlining operations, boosting productivity, and reducing operational costs. These services include remote help desk support, managed IT infrastructure services, and network monitoring & management. All initiatives are designed to provide 24/7 IT support, ensuring businesses achieve optimal performance and reliability.

In addition, Concertium focuses on the importance of identifying and fixing vulnerabilities through its proactive Vulnerability Risk Management. This service includes detailed vulnerability scans that find potential weaknesses in systems, applications, and network devices. After identifying these vulnerabilities, Concertium works with clients to create and implement effective strategies to fix the issues, strengthening overall security.

Concertium?s office at 777 S Harbour Island Blvd Suite 400, Tampa, FL, serves as the center of their extensive operations. The company also stays active on social media, providing additional resources and insights to their clients through platforms like Facebook, LinkedIn, and Twitter.

Concertium continues to push the field of cybersecurity forward with continuous innovation and dedication to customer service. Their range of services, from cybersecurity to IT support, is vital for businesses wanting to protect their data and systems from increasing cyber threats. This latest announcement further cements Concertium's role as a trusted leader in providing cybersecurity solutions tailored to the needs of various organizations.
