

# **Umbrella Labs Launches Revolutionary SARMs Gel: Accurate Dosing with 5 Alpha Hydroxy Laxogenin**

*August 29, 2024*

Tucson, Arizona - August 29, 2024 - PRESSADVANTAGE -

Umbrella Labs has just rolled out a new product: the 5 Alpha Hydroxy Laxogenin SARMs Gel 20MG. This exciting addition responds to the growing need for precise dosing in the research community.

Traditional liquid and powdered SARMs often come with challenges around accurate dosing and application. The new 5 Alpha Hydroxy Laxogenin SARMs Gel, however, offers an easier and more exact way to dose. This gel contains 20MG of 5 Alpha Hydroxy Laxogenin, which is known for its benefits in SARMs research.

Kristin McFadden, a spokesperson for Umbrella Labs, shared her thoughts on the release, saying, "The introduction of the 5 Alpha Hydroxy Laxogenin SARMs Gel is a big milestone for us. Our mission has always been to offer high-quality, precise, and user-friendly products for researchers. This new gel not only meets but surpasses those expectations."

What makes this gel special is its unique formulation. SARMs in liquid or powder forms can be tricky when it comes to accurate dosing. But the gel is much easier to handle. It minimizes risks like evaporation and spillage, which helps ensure more consistent results in research.

Umbrella Labs is committed to high standards, and this new product is no exception. Each batch of the 5 Alpha Hydroxy Laxogenin SARMs Gel is thoroughly tested to meet pharmaceutical-grade standards. This is key for researchers who depend on reliable substances for their studies.

This new gel fits perfectly with Umbrella Labs' wide range of SARMs, nootropics, and peptides, which come in various forms, including liquid, powder, and now, sarms gels. For researchers looking to acquire sarms online, this new gel offers a convenient and precise option.

Umbrella Labs also provides a peptide calculator on their website. This tool helps researchers figure out the exact dosages needed for their studies, adding another level of accuracy to their work.

Another thing that sets Umbrella Labs apart is their focus on customer satisfaction. They offer discounts for bulk purchases: 10% off orders over \$100 and 20% off orders over \$200. This makes high-quality research products more affordable.

Kristin McFadden added, "Our goal is to give researchers dependable and practical solutions. By providing discounts on bulk orders, we hope to make high-quality research more accessible and cost-effective." More details on discounts can be found on their website.

This new 5 Alpha Hydroxy Laxogenin SARMS Gel is expected to gain a lot of interest from researchers looking for better ways to enhance their studies. Its precise dosing and easy application make it a strong contender in the field.

For those interested in the new gel and other products from Umbrella Labs, more information is available on their website. Researchers can easily acquire sarms online and explore the range of SARMS and peptides offered on their website.

The launch of this gel represents a significant step forward in SARMS options, particularly sarm gels, and is likely to have a meaningful impact on research. Umbrella Labs continues to innovate and meet the evolving needs of researchers with products like the 5 Alpha Hydroxy Laxogenin SARMS Gel.

With a focus on quality, reliability, and customer satisfaction, Umbrella Labs remains a trusted name in SARMS, nootropics, and peptides. Researchers are encouraged to try out the new sarms gels formulation to see its benefits for their work.
