

Diamond Plus Invisalign Treatment Now Available in Mount Holly for All Ages

June 25, 2024

June 25, 2024 - PRESSADVANTAGE -

Morrone, Kaye & Yucha Orthodontics has announced new Invisalign services for different age groups at their Mount Holly location. They will now offer tailored Invisalign treatments for adults, teens, and young children.

Dr. Richard expressed excitement about the expanded services, noting that more patients can now enjoy the convenience and effectiveness of Invisalign treatments. The focus on Invisalign First in Mount Holly aims to meet the orthodontic needs of young children, making early intervention possible. This can prevent more complex dental problems later on by addressing developmental issues early, allowing children to grow into adolescence with healthier mouths. To learn more about Invisalign and its benefits, patients can visit the practice's dedicated Invisalign page on their website.

Teenagers will benefit from the specialized Invisalign Teen in Mount Holly. Dr. Benjamin mentioned that Invisalign Teen provides a less noticeable alternative to traditional braces, which can help boost confidence

during a crucial developmental stage. The clear aligners are also removable, making them easier to clean and maintain. This flexibility is especially helpful for teens who juggle various activities and responsibilities. Additional information about these benefits and the Invisalign Teen process can be found on their website.

Adult patients can now take advantage of Invisalign for Adult Treatment in Mount Holly. These aligners allow adults to fix dental issues without the need for visible metal braces. Dr. Benjamin noted that many adults want to improve their smiles but are worried about the look of traditional braces. The nearly invisible aligners can be removed for meals and important events, making them an appealing choice for adults conscious about their professional and social appearances. More details about adult treatment options are accessible on the MKY Orthodontics website.

These three types of Invisalign treatments are designed to meet the unique needs of different age groups, ensuring a more personalized approach to orthodontic care. Dr. Benjamin explained that technology plays a key role in the new treatments, allowing for precise and customized plans. Patients begin with a thorough initial consultation to determine the best treatment options for their specific needs.

Dr. Richard stressed the importance of early orthodontic evaluations, recommending that children have their first consultation by age seven. Early assessments can identify potential dental issues before they become more severe, allowing for timely treatment and setting up healthier smiles from a young age. Parents can now consider Invisalign First as a viable option for their children's orthodontic needs. Information on how to schedule a first consultation is available on the practice's website.

Morrone, Kaye & Yucha Orthodontics remains committed to continuous staff education and integrating the latest technological advancements. Dr. Benjamin highlighted that staying updated with industry practices ensures high-quality care for patients. The practice has invested in state-of-the-art equipment to improve diagnostic accuracy and treatment effectiveness, benefiting patients undergoing Invisalign treatment.

The orthodontic community in Mount Holly is welcoming the expanded Invisalign services and the potential for improving oral health across different age groups. By offering Invisalign First, Invisalign Teen, and Invisalign for Adult Treatment, Morrone, Kaye & Yucha Orthodontics aims to efficiently meet the diverse needs of their patients. The practice believes these new services will provide long-term dental health benefits and enhance the quality of life for their patients.

Dr. Richard noted that their goal is to offer effective and convenient orthodontic solutions tailored to each patient's needs. He is confident that the new Invisalign treatments will positively impact the community's dental health. Dr. Richard added that patient feedback will be essential in continually refining their services.

For those interested in trying the new Invisalign treatments at Morrone, Kaye & Yucha Orthodontics,

initial consultations can be scheduled through their official website or by contacting their office directly.

The practice invites new and existing patients to take advantage of the personalized treatments now available. Morrone, Kaye & Yucha Orthodontics is dedicated to enhancing patient experiences through comprehensive and innovative orthodontic care. Introducing these targeted Invisalign services is a significant step towards that goal.
