

Pre-Purchase Pest Control Inspections On The Sunshine Coast Now Offered

January 06, 2016

January 06, 2016 - PRESSADVANTAGE -

Zero Pest & Pest Control, a business in Minyama, Queensland, Australia, is proud to announce that they now offer pre-purchase pest inspections for homes and investment properties. Additionally, they offer commercial pest control services, targeted specifically at businesses. The Sunshine Coast pest control services have already been positively received.

Mick Kinnear from Zero Pest & Pest Control says: "Once a property has pests, they are incredibly difficult to get rid of and it is important to allow the experts to eliminate them. Our pre-purchase pest inspection means that people can find out which pests they have and what it will cost to get rid of them before we even enter their property. We're glad to see that people are enjoying this service and that we're working together to rid the world of pests."

The pre purchase pest inspection is a service that is designed for those who are considering the purchase of a property. It will inform them whether or not a pest problem is present. Additionally, if Zero Pest & Pest Control does identify an issue, they will be informed as to how much it will cost to have the issue resolved. This will give them an opportunity to decide whether or not the property is still worth buying and investing in.

The various services offered by the pest control company have been very positively received by their many clients. "My husband and I have used Mick with Zero Pest & Pest Control quite a few times in our properties over the last few years," says Rose L. "Mick has always been reliable, showed up on time, and explained everything very clearly to us. Mick has a passion for "pest busting" and I feel comfortable knowing that I have someone in the local area whom I trust to get the job done. I would not hesitate to recommend Mick at Zero Pest."

The company now offers both domestic and commercial pest control services. As such, they encourage all businesses to contact them if they believe they have an issue with pests, or if they want to check whether or not pests are present before purchasing or moving to a new property.
