

OptiSkyn Unveils Revolutionary Plasma Pen Treatment in Davenport, IA for Youthful Skin Transformation

June 14, 2024

June 14, 2024 -

OptiSkyn Skin Care Clinic has introduced the Plasma Pen treatment in Davenport, IA. The Plasma Pen is gaining attention for its non-invasive method to lift, tighten, rejuvenate, resurface, and regenerate skin. This treatment uses plasma energy to create tiny injuries on the skin's surface. These micro-injuries kickstart the body's natural healing process, leading to increased collagen and elastin production. These essential proteins help keep the skin healthy and youthful.

Yvonne Wright, the founder and a certified Plasmatologist at OptiSkyn, spoke about the new treatment. "The introduction of the Plasma Pen at our clinic is a significant step towards offering more advanced skin care solutions to our clients in Quad Cities," Wright said. "This treatment aligns perfectly with our commitment to providing effective, safe, and non-invasive options for skin rejuvenation."

OptiSkyn also offers Red Light Therapy. This non-invasive procedure uses low-level red light to address skin issues like wrinkles, scars, and stubborn wounds. It works by activating cell functions, reducing inflammation,

speeding up healing, and boosting collagen production. These effects contribute positively to overall skin health.

Wright shared more about the Red Light Therapy, stating, "The addition of Red Light Therapy complements our existing treatments and gives our clients another effective option for enhancing their skin's appearance and health. We are dedicated to keeping up with the latest advancements in skin care to offer the best possible treatments."

For more information, individuals can visit https://www.pressadvantage.com/story/66988-optiskyn-launches-revolutionary-red-light-therapy-in-davenport-ia-promising-enhanced-skin-care-solut to learn about the clinic's new Red Light Therapy services in Davenport, IA. This treatment offers promising results in skin care using innovative light therapy.

OptiSkyn ensures that all its treatments are lab-tested and FDA-approved. The clinic focuses on personalized care, addressing the unique skin care needs and goals of each client. Introducing the Plasma Pen treatment and Red Light Therapy shows OptiSkyn's ongoing efforts to update and provide advanced skin treatments.

The clinic offers various skin rejuvenation packages to meet different needs. These packages include treatments for smaller areas and minor scars to complete facial transformations. The Starter Package is aimed at minor improvements, while the Upper or Lower Face Transformation targets specific facial areas like the forehead, cheeks, and nasal folds. The Full Facial Transformation package aims to rejuvenate the entire face, offering a thorough skin care solution.
