

Access Interiors Expands Office Refurbishment Services to St. Ives

July 05, 2024

Cambridge, CB - July 05, 2024 - PRESSADVANTAGE -

Access Interiors Ltd., a well-known commercial project management company, is excited to announce it is expanding its office refurbishment services to St. Ives. Founded in 1994 and based in Cambridge and Ely, UK, the company specializes in a variety of office design and fit-out services. These include refurbishments, space planning, dilapidations, relocations, movement management, and comprehensive management of commercial interiors projects. Now, local businesses in the charming market town of St. Ives can benefit from their expertise and high standards.

"Expanding our services to St. Ives allows us to meet the growing demand for quality office refurbishments in this area," said Martin Dawson, CEO of Access Interiors. "We are excited to bring our extensive expertise and high standards to both established enterprises and newcomers to the local business community."

Access Interiors offers a variety of services designed to modernize and improve office environments. From minor upgrades to major commercial projects, their office refurbishment services are customized to meet client needs while sticking to performance specifications and budgets. These refurbishments can update workspaces, integrate modern interior solutions, and create productive and visually pleasing environments.

Their office space planning service aims to optimize the use of available space by considering factors such as workflow, communication, and future growth. This ensures that office layouts are not only efficient but also promote productivity.

Office dilapidations, another service offered by Access Interiors, involve restoring a property's condition at the end of a lease agreement. This service includes all necessary repairs and renovations to meet lease terms, which is important for businesses needing to return a property in its original state.

For businesses planning to relocate, Access Interiors provides a comprehensive office relocation service. This covers everything from planning and packing to transportation and setup at the new location, minimizing disruption to business operations.

Additionally, the company offers office movement management services. Designed to handle the internal movement of employees and equipment within an office, this service coordinates and oversees the process to minimize downtime and interference.

"With our expansion into St. Ives, we aim to provide the same level of high-quality service and personalized attention that our clients have come to expect," Martin Dawson added. "Our goal is to help businesses in St. Ives create work environments that support productivity, growth, and employee well-being."

Access Interiors also provides various office interior solutions. These range from suspended ceilings, office furniture, and partition systems to commercial flooring installation, mezzanine floors, electrical installations, and air conditioning systems. Each product is chosen to meet specific performance specifications and budget limits, ensuring the best results for clients.

One standout service is the installation of mezzanine floors. These intermediate floors offer additional space in both industrial and office settings, providing a practical solution for businesses wanting to expand their work areas without needing to move.

Access Interiors prides itself on the high percentage of repeat business, reflecting their commitment to quality service and excellent workmanship. The company showcases its work through featured design projects and shares insights through design articles, adding extra value for clients.
