# Home Instead Totton Launches Expedited Home Care Service to Meet Growing Needs

*August 07, 2024*

August 07, 2024 -
Home Instead Totton has announced the launch of its new expedited home care service, tailored for residents in Totton, Eling, Dibden, Holbury, Beaulieu, Marchwood, Blackfield, and nearby locations. This new service aims to cut down waiting times, helping clients get the care and support they need quickly and efficiently.

The service is designed to meet various needs of the local community, offering a wide range of home care options. These include home visits, specialised care, health care, and live-in care. Each service is designed to address specific client needs, from daily activities to complex health conditions.

Home visits cover many aspects of daily living assistance like companionship, personal care, home help and housekeeping, night care, day care, and respite care. Companionship ensures clients don't feel lonely, with caregivers engaging in conversations, joining in hobbies, and accompanying them on outings. Home help and housekeeping assist with maintaining their homes, while personal care provides dignity during daily activities such as bathing and dressing.

For those needing more specialised attention, Home Instead Totton - Home Care offers dedicated care for clients with conditions like Alzheimer's, dementia, cancer, Parkinson's, neurological conditions, and those needing palliative care. This approach makes sure the care is compassionate and respectful, helping clients stay comfortable and safe in familiar surroundings.

Tim Oswald, spokesperson for the company, said, "Our expedited home care service is a response to the growing need for timely and efficient care in our community. We understand how important it is for families to have quick access to quality care, and we are committed to making that possible."

Health care services at Home Instead Totton covers various medical needs, such as nail care, catheter care,

stoma care, simple wound care, vital signs monitoring, diabetes monitoring, non-invasive ventilation, and gastrostomy care and feeding support. These services enable clients to manage their health conditions from home, reducing hospital visits.

The live-in care service provides dedicated caregivers for clients needing constant attention. This ensures clients receive around-the-clock assistance and companionship, giving families peace of mind that their loved ones are well cared for at all times.

Home Instead Totton's unique approach also includes a special matchmaking system. This system pairs caregivers with clients based on shared interests and activities, not just care needs. This initiative helps build deep, meaningful relationships, enhancing the overall well-being of clients.

"In developing our expedited home care service, the goal was to meet the immediate care needs of our clients and build genuine connections between caregivers and clients," said Mr. Oswald. "Our matchmaking system ensures that clients receive care from individuals who share common interests and hobbies, making the care experience more personal and fulfilling."

Families seeking home care services can expect minimal waiting times, allowing for a smoother transition into receiving the necessary care. This aligns with the company's mission to deliver high-quality, personalised care promptly.

Home Instead Totton has gained recognition for its tailored care plans, compassionate care professionals, and flexible care options. With over a decade of experience, it has received positive feedback from clients who appreciate its proactive, kind, and patient approach to care.
