

AZ Wound Acquires Advanced Wound Institute, Expands Comprehensive Wound Care in the Valley

August 29, 2024

August 29, 2024 - PRESSADVANTAGE -

Phoenix, AZ - AZ Wound, also known as AZ Wound & Hyperbaric Medicine, has acquired the Advanced Wound Institute, extending its services across Phoenix, Mesa, and Gilbert. This move makes AZ Wound one of the largest privately-owned wound care practices in Arizona. And the only privately-owned medical hyperbaric locations in Arizona.

AZ Wound provides advanced, personalized wound care and hyperbaric oxygen therapy, ensuring patients receive advanced comprehensive wound care.

The Gilbert location of Advanced Wound Institute is transitioning to AZ Wound, assuring current patients won't experience any interruptions in their treatment. Some team members from Advanced Wound Institute will also join the team at AZ Wound ? Gilbert, ensuring continuity in care.

"We are excited to welcome the Advanced Wound Institute team and their patients into the AZ Wound family," said Dr. Yadwinder 'Vinnie' Dhillon, owner of AZ Wound. "Expanding our reach in the valley helps to ensure an AZ Wound care clinic is conveniently located for our patients across the valley, making

comprehensive wound care accessible to a broader community. We remain committed to delivering the highest standard of patient care."

Hyperbaric Oxygen Therapy enhances the body's natural healing process and promotes healing in damaged cells. The therapy kills bacteria, fungi, and viruses, helps to reduce inflammation, improves blood flow, stimulates antioxidants, speeds up bone regeneration, and improves the effectiveness of antibiotics. This treatment involves breathing pure oxygen in a pressurized chamber, increasing the amount of oxygen in the blood. HBOT can help treat wounds that have not responded to more traditional treatments. Hyperbaric oxygen treatments can show a significant reduction or reversal of complications from radiation. Used as a primary treatment for many tissues damaged by radiation in the treatment of cancers.

AZ Wound treats various wound types, such as arterial ulcers, diabetic foot ulcers, pressure ulcers, surgical wounds, and trauma wounds. Its primary focus is on creating personalized care plans to promote optimal healing and recovery.

AZ Wound also provides treatment for radiation therapy side effects and complications from cranial radiation. These treatments help manage skin changes, fatigue, cognitive changes, and hormonal imbalances, which can significantly impact a patient's quality of life.

Dr. Yadwinder "Vinnie" Dhillon, lead physician and owner of AZ Wound, has been recognized as a top doctor in wound care by Phoenix Magazine every year since 2018. Under his guidance, AZ Wound prioritizes patient well-being and advanced technology to deliver quality care.

"Our mission has always been to provide state-of-the-art wound care with a personal touch," said Dr. Dhillon. "We provide a comfortable and supportive environment, focused on educating our patients on the treatment of acute and chronic wounds. With the acquisition of Advanced Wound Institute, we strengthen our ability to offer unparalleled care and treatment options."

Hospitals, providers and patients with questions about the acquisition or services offered by AZ Wound can email us at frontoffice@azwound.com or visit their website at azwound.com for detailed information, contact numbers, and office locations. They can also stay informed and connected with us on LinkedIn, where we share important announcements and advancements in wound care.

The acquisition marks a strategic step in AZ Wound's commitment to expanding access to high-quality wound care. This milestone establishes them as the Arizona leader in personalized wound care solutions.
