

AnywhereCam Announces Community Camera Initiative

July 08, 2024

Denver, Colorado - July 08, 2024 - PRESSADVANTAGE -

AnywhereCam announces the launch of an initiative to support community camera programs across the United States.

AnywhereCam, a company specializing in remote surveillance solutions, is pleased to announce the launch of a new initiative aimed at making communities across the United States safer through the use of AnywhereCam's innovative surveillance technology.

Many communities across the US have community camera programs already in place. Through these programs, private citizens can alert their local law enforcement agencies that they have a surveillance camera located on their property. Should a crime occur, the police can check the camera registry to see if a surveillance camera in the area may have recorded the crime or caught the perpetrators on camera. Law enforcement can then contact the owner of the surveillance camera and ask them for permission to view the footage. AnywhereCam offers two different camera options, visit their website to learn which solution is best for you. To view their shop go to <https://anywhere.com/collections/cameras>.

At AnywhereCam, we're from a rural area ourselves, so we understand that not every location has power and Wi-Fi to operate security cameras. It's not a secret that criminals target remote locations because they're easier to hit, and frankly, we're sick of it. With our solar powered, 4G cellular surveillance cameras, it's now possible to monitor places like ranches, parking lots, construction sites, storage facilities, entrance gates, and other remote locations where previously it wasn't feasible to place surveillance cameras. We know our customers are tired of rampant property theft in rural and remote locations, and they want to do something about it. AnywhereCam is a new tool to help citizens do something proactive to make their communities safer and more secure," says Mike Blecha, Founder & CEO.

AnywhereCam is offering \$50 discounts on its products to customers who agree to register their AnywhereCam products with their local community camera programs. AnywhereCam also encourages local cities, counties, and law enforcement agencies to partner with the company and offer a matching contribution to further reduce the cost of the cameras. By joining forces with AnywhereCam, local government and police agencies will ensure the success of the community camera programs that they have already put in place.

Cities, counties, and law enforcement agencies interested in partnering with AnywhereCam on this initiative should fill out the contact form on the company's website at www.anywhere.com.

About AnywhereCam

AnywhereCam is a surveillance solutions company located in Fort Morgan, CO. The company specializes in solar-powered, 4G cellular cameras that can be placed virtually anywhere. The cameras do not require a local source of power or Wi-Fi to operate. The cameras are weather-proof and easy to install. AnywhereCam is the best option for personal or business use in a rural area, because:

- AnywhereCam is the most cost-effective and convenient option on the market
- Save time and improve efficiency by monitoring multiple locations at the same time
- AnywhereCam's app is powered by Google Cloud Storage, meaning they can support even the largest enterprises
- FCC certification means that one can be confident in the security of data transmission and their hardware
- No power and no Wi-Fi is no problem. AnywhereCam integrates cameras, SIM cards, and Cloud Storage.
