

Philadelphia Plastic Surgeon Dr. Brannon Claytor Wins Best Non-Surgical Publication Award at Beauty Through Science Conference

July 09, 2024

PHILADELPHIA - July 09, 2024 -

Philadelphia, PA?Dr. R. Brannon Claytor, Chief of Plastic Surgery at Main Line Health and a board-certified plastic surgeon at Claytor Noone Plastic Surgery, has been awarded for Best Non-Surgical Publication at the prestigious Beauty Through Science conference in Stockholm. Dr. Claytor?s innovative paper, ?LaMiNa: A Creative Synergistic Approach to Facial Rejuvenation,? was recognized for its groundbreaking contributions to aesthetic medicine.

?I am deeply honored to receive the Best Non-Surgical Publication award from Beauty Through Science,? said Dr. Claytor. ?This recognition highlights the importance of this innovative new facial rejuvenation approach and validates the energy we invested in developing and perfecting the LaMiNa technique. It is rewarding to be acknowledged by worldwide leaders in aesthetic medicine.?

Beauty Through Science has been a premier educational event in aesthetic medicine since 2005. The Best

Non-Surgical Publication Award is a significant accolade in the field of plastic surgery, acknowledging innovative research that advances non-surgical techniques and enhances patient outcomes. The Beauty Through Science conference is renowned for its focus on aesthetic medicine innovations, attracting top-tier professionals and researchers from around the globe. Dr. Claytor was presented with this award alongside Dr. Hiram Elizondo Vilchez (Mexico) and Dr. Tunc Tiryaki (Turkey), who also took home the Best Non-Surgical Publication Award.

Dr. Claytor's award-winning paper presents the LaMiNa technique, a novel approach to facial rejuvenation that combines various non-surgical methods to achieve synergistic results. This technique emphasizes minimal invasiveness while maximizing aesthetic benefits, offering patients an effective solution with reduced recovery time.

LaMiNa is short for Laser skin resurfacing, Microneedling, and Nanofat grafting. Philadelphia plastic surgeon Dr. Claytor developed the technique, combining the benefits of CO2 laser skin resurfacing, which removes the outer layer of damaged skin and stimulates collagen production, with microneedling, which creates micro-injuries to further enhance collagen and elastin production. The addition of nanofat grafting, where processed fat from the patient's own body is applied to the skin, accelerates healing and improves skin texture and tone. The procedure enhances skin regeneration, leading to a smoother, more youthful complexion.

?LaMiNa provides incredibly effective facial anti-aging results,? commented Dr. Claytor. ?I?ve found that this combination is especially outstanding at reducing the appearance of fine lines and wrinkles around the mouth, which are notoriously difficult to treat without surgery.?

Dr. Claytor's research on the LaMiNa technique has demonstrated its effectiveness in improving skin elasticity, reducing perioral wrinkles (around the mouth), and promoting overall facial rejuvenation. Patients who have undergone the procedure report significant improvements in skin texture and tone, with minimal discomfort and downtime when compared with a traditional facelift. This innovative approach has positioned Dr. Claytor as a leader in non-surgical facial rejuvenation, on top of his work in plastic surgery innovation.

?I am energized by the forward-thinking research that was celebrated at the conference alongside my work, ? Dr. Claytor says. ?There are many creative, innovative physicians working to make a significant impact on our field, and that is worth celebrating. We owe it to patients to always innovate and search for ways to improve upon the existing arsenal of treatment options that patients rely on.?

Dr. Claytor's career is distinguished by his dedication to advancing plastic surgery techniques as well as his

commitment to patient care; he is also an expert in deep plane facelifts and drain-free tummy tucks, and offers a full range of plastic surgery procedures at his practice in Bryn Mawr, PA. Those interested in learning more about Dr. Claytor or making an appointment at his Philadelphia plastic surgery clinic may call 610-527-4833 or visit the practice?s website.
