

Mindvalley's Upcoming AI Summit 2024 Leads the Path to Personal Growth and AI Mastery

July 12, 2024

AVENTURA, FL - July 12, 2024 - PRESSADVANTAGE -

Mindvalley, the leading platform for personal growth and development, is once again setting the stage for a transformative experience with its highly anticipated AI Summit that will take place between July 12-14, 2024. As the world grapples with the rapid rise of artificial intelligence, Mindvalley focuses on helping people choose the right path and harness AI for their benefit.

Vitaliy Lano, founder of IMHO Reviews, emphasizes the importance of informed decision-making in personal growth: "Every decision and thought we accept leads us to a path in life. Adapting to the wrong ideas can lead us somewhere we did not plan. Mindvalley helps me and millions of others navigate these choices with clarity and purpose."

Over the past few years, the landscape of online learning has been significantly influenced by both paid and free platforms. However, with the surge of AI-generated content, there has been a noticeable decline in quality, as many creators leverage AI without the proper knowledge, resulting in shallow and repetitive

information. Mindvalley, recognized as a leader in the industry, has always been known for taking a different approach. The platform teaches how to leverage AI to enhance content creation and leadership rather than being replaced by it.

"AI is a powerful tool, but its true potential is unlocked only when combined with human creativity and wisdom," Lano stated. "Mindvalley shows how to use AI effectively, ensuring their content is impactful and genuine."

The AI Summit 2024 promises to be a groundbreaking event, featuring a lineup of esteemed speakers and thought leaders. The summit, which starts on July 12, 2024, will be a three-day live experience, emphasizing the importance of real-time participation. With over 100,000 attendees expected, the summit aims to provide cutting-edge insights and practical applications of AI in personal and professional growth.

The AI Summit's agenda includes the following topics: "Be More Productive" with Mindvalley's founder Vishen Lakhiani, who will discuss how to save 1-2 days of the workload every week; "Work Smarter, Not Harder" with Iman Oubou, who will focus on AI-powered workflows for content scaling; "The Fast & Easy Way to Transcribe & Repurpose Your Content" with Andri Peetso; "Advanced Prompt Engineering to Automate Your Work As You Sleep" by Vyintas Glodenis; and "Creative Workflows to Make Branding & Marketing A Breeze" by Manon Dave, award-winning creative director and composer.

The live format ensures an immersive experience, with no recordings available, urging participants to engage fully during the event. Among the notable speakers, Manon Dave returns to share his expertise in creative workflows for branding and marketing. He recently collaborated with will.i.am and Mercedes-AMG to develop Sound Drive, an AI-driven music experience based on driving patterns. His session promises to be a highlight, offering unique insights into AI's creative potential. Iman Oubou, a leading figure in AI with her company Vocabale.ai, will demonstrate how to elevate content creation using AI-powered workflows. Her session aims to free up time for high-level creativity and strategy, a critical skill in today's fast-paced digital landscape. Vyintas Glodenis, a standout speaker from last year's summit, will delve into advanced prompt engineering, showcasing techniques to automate work seamlessly, even during sleep.

Right now, Mindvalley is also offering a 50% summer discount on its annual membership. The membership, now priced at \$199 per year (regular price \$399), provides unlimited access to over 100 programs, including mind, body, relationships, career, and spirituality topics.

"Mindvalley's membership is an investment in personal growth," Lano expressed. "This summer discount is a unique opportunity to access world-class education at an affordable price."
