

OptiSkyn Launches Innovative Plasma Pen Treatment in Quad Cities: A New Era of Skin Care Solutions

July 15, 2024

July 15, 2024 -

OptiSkyn Skin Care Clinic has just announced the addition of Red Light Therapy to its lineup of skin care services. This therapy uses specific wavelengths of light to penetrate the skin, which helps in reducing inflammation, promoting healing, and increasing collagen production. It's a new method to tackle various skin issues like wrinkles, fine lines, scars, and persistent wounds.

Yvonne Wright, the founder of OptiSkyn and a certified Plasmatologist, expressed her excitement about the new therapy. "We are thrilled to offer Red Light Therapy to our clients. This addition aligns with our goal to provide the most up-to-date and effective skin care treatments. Our commitment is always to safety and innovation," Wright said. OptiSkyn's treatments, including the Plasma Pen procedures and various skin rejuvenation packages, are all designed with safety and effectiveness in mind.

The clinic ensures that all treatments are laboratory-tested and FDA-approved, maintaining the highest standards. The addition of Red Light Therapy enhances the existing suite of services, giving clients another

reliable option for improving their skin health. By activating cellular functions and boosting collagen production, this therapy helps achieve a healthier and more radiant complexion.

OptiSkyn's Plasma Pen Treatment is another top-quality service they offer. This non-invasive technique uses plasma energy to lift and tighten the skin. The Plasma Pen creates small areas of ablation on the skin's surface, which triggers a natural healing response that stimulates collagen and elastin production. These treatments help improve skin tightening and cellular hydration. For many clients, the effects are long-lasting and effective.

"OptiSkyn always focuses on providing advanced treatments that encourage natural healing and skin improvement. Our Plasma Pen Treatment is a testament to this commitment," Wright stated. "The micro trauma from the plasma energy leads to increased collagen and elastin production, which is crucial for healthier skin."

OptiSkyn offers a range of skin rejuvenation packages to meet different client needs. There's a Starter Package for smaller areas and minor scars, an Upper or Lower Face Transformation for specific facial spots, and a Full Facial Transformation for an extensive facial rejuvenation. Each package addresses specific concerns to deliver effective results.

With over four years in business, Yvonne Wright and her team at OptiSkyn have amassed over 2,100 hours of training and research. They have completed more than 100 skin transformations. The clinic even offers custom packages tailored specifically for men, ensuring that everyone's skin care needs and goals are met effectively.

OptiSkyn Skin Care Clinic operates Monday through Friday from 9:00 am to 6:00 pm.
