Burke Bros Moving Group Leads Sustainable Removals to Australia with Carbon Neutral Certification

July 18, 2024

Wolverhampton, England - July 18, 2024 -
Burke Bros Moving Group has just launched a new initiative focused on sustainability in their services. They are the world's first moving company to get the PAS2060 Carbon Neutral certification. Now, Burke Bros is putting a spotlight on their eco-friendly practices, especially for those moving to Australia.

Burke Bros offers many services, including UK, European, and International removals, along with pet transport and vehicle shipping. The company now emphasizes how these services align with sustainable and eco-friendly practices. This is particularly important for their operations in Australia, where environmental concerns are a big deal.

For those moving to Australia, Burke Bros covers cities like Perth, Adelaide, Melbourne, Sydney, and Brisbane. Their service includes packing, shipping, customs clearance, and final delivery to residences, all while minimizing carbon footprints.

One part of their sustainable moving initiative is optimizing resources. This includes using recycled packing materials, efficient transport methods, and careful planning to cut down fuel use. They also offer free pre-move surveys to help clients plan efficiently, further reducing their environmental impact.

Gary Burke, CEO of Burke Bros, said, "Our dedication to eco-friendly practices is not just for show; it's a core part of how we work. Moving can impact the environment a lot, and we're proud to offer services that lessen this impact, especially for long distances like moving to Australia."

Burke Bros also encourages clients to adopt green practices by sharing tips and resources. Some of their advice includes decluttering before the move to reduce waste, using eco-friendly packaging, and choosing sea freight over air freight because it has lower carbon emissions. More information can be found here: https://burkebros.co.uk/services/moving-overseas/moving-to-australia/

Gary Burke added, "We want to make Sustainable Moving the standard. By integrating these practices, we're setting a new industry benchmark and encouraging others to follow."

Their focus on the Australian market comes as international relocations face more scrutiny for environmental impact. Through their green services, Burke Bros is leading a change in the moving industry. Clients benefit from smooth transitions and responsible environmental practices.

The company also extends their sustainable services to pet and vehicle transport, ensuring every aspect of a client's move is eco-friendly. Their pet transport service ensures animals are moved comfortably and safely, while their vehicle shipping minimizes carbon emissions.

For those thinking about moving, Burke Bros offers free resources like downloadable brochures and access to professional advice. Clients can also request callbacks for personalized consultations, making sure every part of their move is handled with care and sustainability in mind.

Burke Bros continues to be an accredited member of the British Association of Removers (BAR) and the Federation Internationale des Demenageurs Internationaux (FIDI). These memberships highlight the company's commitment to high-quality and reliable service standards.

Readers can also learn more about the company's history, news, and additional blogs on their journey and ongoing initiatives on their respective pages of their website. These resources give a full picture of Burke Bros' efforts in leading a greener moving industry.
