IV Solution & Ketamine Centers of Chicago Expands Healing Innovations with New PTSD Treatments

August 01, 2024

CHICAGO, IL - August 01, 2024 -
IV Solution & Ketamine Centers of Chicago has announced that it is expanding its services to include new treatments for various mental health conditions and chronic pain. As the first private facility in Chicago to offer intravenous ketamine therapies, the center is focused on providing innovative solutions for depression, chronic pain, fibromyalgia, and other conditions.

One of the main treatments offered at the center is intravenous ketamine therapy. This therapy is known to help with conditions like depression, anxiety, PTSD, bipolar disorder, chronic pain, migraines, and fibromyalgia. Ketamine therapy is especially valuable because it can provide relief when other treatments have not worked, making it a significant advancement in mental health care.

In addition to ketamine therapy, the center now offers the Stellate Ganglion Block (SGB) for PTSD. This new treatment involves an injection in the neck to block nerve signals that cause PTSD symptoms. By including SGB therapy, the center shows its dedication to providing groundbreaking treatments that address the core

issues of mental health problems.

"Our mission is to provide comprehensive care that goes beyond merely masking symptoms," said Dr. Bal Nandra, the Chief Medical Officer at IV Solution & Ketamine Centers of Chicago. "By offering a range of treatments, including intravenous ketamine therapy and SGB for PTSD, we aim to deliver real, lasting relief to our patients."

The center also provides NAD+ Therapy. This therapy uses a coenzyme found in all living cells to improve mental clarity, alertness, concentration, and memory. NAD+ Therapy has shown promise in enhancing brain function and reducing the effects of age-related diseases.

For patients facing financial challenges, IV Solution & Ketamine Centers of Chicago has partnered with CareCredit to offer financing options. This program helps make advanced intravenous therapies more affordable for patients who might struggle to pay for treatment out of pocket.

Patients at the center go through a detailed health screening process. This helps the medical team determine each person's suitability for the treatments available, ensuring that care is personalized to meet specific needs.

"We believe that every patient deserves a personalized approach to their treatment," added Dr. Bal Nandra. "From the initial health screening to the administration of therapies, our goal is to provide a comprehensive, tailored care experience."

The center provides a range of resources for its patients. These include information about what to expect during treatment, answers to frequently asked questions, testimonials from previous patients, and forms for new patients. This support system ensures that individuals are well-informed and prepared for their treatment journey.

The center's expanded services and patient support infrastructure are featured in a recent media story, which offers a closer look at the innovative treatments available. For more details, visit the center's media page.

IV Solution & Ketamine Centers of Chicago has been increasing its online presence to better reach people who need its services. The center is active on platforms like Instagram, where it shares updates and educational content. The center's YouTube channel also features patient testimonials and informative videos about the treatments offered.

The center is committed to ensuring that patients have easy access to all necessary information. For those looking for treatment for anxiety, chronic pain, treatment-resistant depression, fibromyalgia, OCD, PTSD, or

other related conditions, comprehensive details are available on the center's website.

For those interested in following the center's updates and stories shared by patients, the center also maintains an active Twitter account.

With its range of advanced treatments and a strong support system, IV Solution & Ketamine Centers of Chicago provides a hopeful path to relief for individuals suffering from various mental health conditions and chronic pain. Through partnerships and a patient-centric approach, the center strives to make life-changing treatments accessible to those in need. Visit IV Solution & Ketamine Centers of Chicago online for more information about their cutting-edge treatments and patient care resources.
