Arrowhead Clinic Discusses Advanced Whiplash Treatment to Ensure Comprehensive Recovery

July 22, 2024

Savannah, Georgia - July 22, 2024 -
Arrowhead Clinic is sharing important information on whiplash treatment, following a recent blog post that outlines steps to take after a whiplash injury in Savannah, Georgia. With over 40 years of experience in chiropractic care, Arrowhead Clinic aims to educate the public on why proper diagnosis and treatment for whiplash injuries are important. For more information, visit Arrowhead Clinic's recent blog post on whiplash treatment.

Dr. Jeremy Thompson, a senior chiropractor at Arrowhead Clinic, explains the complexity of whiplash injuries. "Whiplash is often misunderstood. Symptoms might not show up right away because of the body's adrenaline response after an accident. Getting immediate medical attention can prevent long-term issues."

Whiplash involves a neck strain or sprain caused by the neck being suddenly jerked back and forth. Common symptoms include neck pain, stiffness, dizziness, muscle spasms, reduced muscle strength, and limited range of motion. In more severe cases, symptoms can include blurry vision, ringing in the ears, memory problems, depression, sleep disturbances, and difficulty concentrating.

The recent blog by Arrowhead Clinic offers a detailed guide on recognizing these symptoms and what to do after being in an accident. Dr. Thompson advises, "Even if you feel fine, it's crucial to get checked by professionals who specialize in soft tissue injuries. Proper medical documentation is also key for insurance purposes."

Arrowhead Clinic provides various services for injuries from car accidents, including whiplash. They use advanced tools like digital X-Rays and MRIs to identify the root cause of the pain accurately. By addressing the underlying cause, the clinic creates customized treatment plans aimed at full recovery.

For those suffering from whiplash, Arrowhead Clinic recommends chiropractic care. Their chiropractors specialize in soft tissue rehabilitation and use modern treatment methods such as Computer-Guided Spinal Decompression, Active Release Therapy, Electro Muscle Stimulation, Functional Movement Screening, and the Fascial Distortion Model to provide relief.

Arrowhead Clinic highlights the importance of consulting a personal injury chiropractor, especially if the injury is due to an accident caused by someone else. The clinic not only provides treatment but also helps patients with insurance claims and legal consultations. By working with personal injury lawyers, patients can have their treatment costs covered without paying out-of-pocket.

"We strive to offer comprehensive care," says Dr. Thompson. "Our team is dedicated to helping patients through every step of their recovery. From diagnosis to treatment and insurance assistance, we aim to make the whole process as easy as possible."

The blog also recommends seeking legal advice after an accident. This helps ensure patients don't settle for low compensation from insurance companies without proper representation. Legal guidance can lead to better settlements that cover medical expenses and other costs.

Besides treating whiplash injuries, Arrowhead Clinic's services cover a range of musculoskeletal injuries, including those from slip and fall incidents, workplace accidents, and sports injuries. They accept walk-ins and offer same-day appointments, making it easy for patients to get immediate care.

Since 1979, Arrowhead Clinic has been a key part of the Savannah community, known for addressing various forms of musculoskeletal pain and offering quality chiropractic care. The clinic's reputation is built on providing personalized, effective treatment plans and compassionate patient care.

For more information about whiplash treatment, visit Arrowhead Clinic's detailed guide online. Those in need can also find more details about their comprehensive range of services on their website. Those who have been in an accident, contact an Arrowhead Clinic personal injury chiropractor for a free consultation and
