

GreenMountain GreenWalls Expands with Innovative Outdoor Living Plant Walls

July 29, 2024

July 29, 2024 - PRESSADVANTAGE -

GreenMountain GreenWalls has announced its expansion into the market for Outdoor Living Plant Walls. This step shows their dedication to improving both residential and commercial spaces with greenery and nature. Based in Vermont, GreenMountain GreenWalls specializes in creating living plant walls and preserved moss art installations. Their work helps transform spaces into calm, green sanctuaries. They offer living plant wall installations, preserved moss art, interior landscaping, and flexible maintenance options.

GreenMountain GreenWalls offers living plant wall installations for both inside and outside spaces. These walls can be as small as 2x3 feet or as large as 2,000 square feet in a commercial setting. They have options to fit various budgets and spaces, making natural beauty accessible to more people.

Their Outdoor Living Plant Walls are designed to beautify and improve the function of outdoor environments. Having plant walls outside can improve air quality, enhance mental well-being, and create a peaceful atmosphere. The company's expertise allows them to craft solutions tailored to each client's unique style and needs.

According to an article by GreenMountain GreenWalls titled "Outdoor Elegance: The Benefits of Outdoor Living Plant Walls," there is a growing trend of adding plant walls to outdoor spaces. The article points out environmental and health benefits, like better air quality and mental well-being. It also gives tips on designing plant walls to match existing outdoor settings, considering factors like aesthetic alignment, natural materials, and balanced compositions.

Ashley from Highline Design Studio recently praised the company's work. She said, "We worked with GreenMountain GreenWalls on two large projects, one residential and one commercial. Brady and his team were amazing! They went above and beyond to help us template the perfect shape for a curved wall with an organic-shaped moss feature that integrated with wood. It turned out better than we expected. Their

communication, organization, and trustworthiness are unmatched. We look forward to working with them again soon."

GreenMountain GreenWalls also excels in preserved moss art. They create moss walls, framed pieces, and moss sculptures. The preserved moss is real but requires no maintenance, lasting 10-15 years indoors. This makes it a long-lasting, beautiful addition to any space without the need for regular care.

Their interior landscaping services include indoor planters and potted plants, adding life to any setting. They offer customized solutions to enhance the look and feel of interior spaces.

Flexible maintenance is another of GreenMountain GreenWalls' strong points. They offer weekly, biweekly, and monthly services for their installations, working closely with clients to ensure their plants thrive. For large green walls that are hard to water by hand, they offer built-in irrigation systems as well as grooming and fertilizing services.

The company's focus on detail and customer satisfaction has made them a top choice in Northern and Central Vermont for living plant wall services. They provide free consultations and can work within various budgets, making their green solutions accessible to many clients.

In conclusion, GreenMountain GreenWalls is expanding its services, especially in the area of Outdoor Living Plant Walls. Their skill in creating living plant walls and preserved moss art installations has earned them a reputation for turning spaces into green sanctuaries. With a focus on customer satisfaction and careful craftsmanship, the company brings natural beauty to both indoor and outdoor spaces.
